A Booster for Ocean Beach, Point Loma, Mission Bay and Mission Beach

THIRTEENTH YEAR, No. 23 | OCEAN BEACH CALIFORNIA | FRIDAY, APRIL 5, 1935 | PHONE, BAYVIEW 0741 | FIVE CENTS THE COPY

April Showers

(Copyright, W. N. U.)

The Loman Reporter

(POINT LOMA HIGH SCHOOL)

In the performances of "The Rivals" by Sheridan to be given at Point Loma High school on April 11 and 12 under the direction of Emory Shepherd, Barbara Healy, daughter of Mr. and Mrs. M. J. Healy of 3246 Trumbull St., and Clement Gage, son of Mr .and Mrs. W. H. Gage of 4635 Saratoga Avenue will play the leading parts of Mrs. Malaprop and Sir Anthony Absolute. Both young people have emerged from a number of contestants for these two parts and give promise of a much better than average amateur interpretation of the comic roles.

——PLHS——

On Thursday afternon of April 4th at three fifteen in Beth-Israel church on 3rd and Laurel Miss A. Bess Clark of the English department gave a talk to the ladies' auxiliary on the work of the living Jewish writer, Franz Werfel. Miss Clark particularly estimated the book of the hour by Werfel, "The Forty Days of Musa Dagh", but she also discussed his literary output in general, stressing "The Pure in Heart" as well as the Musa Dagh novel that has become an American best seller and has already achieved a fourth printing and ninety thousand copies.

GIRL STAGE MANAGER AT POINT LOMA HIGH SCHOOL

Eleanore Hicks, senior at Point Loma High school, is stage managing a crew of fifteen boys and six girls in the two presentations of Sheridan's "Rivals" on April 11 and 12. Miss Eleanore has been working intensively in drama for the past two years and has this year played the lead in Wilde's "The Importance of Being Earnest"; and she has worked on the stage crew for a number of productions; and business managed as well Her stage managing of "The Rivals" comes as a climax to her drama work shortly before graduation.

The stage craft of these performances of Sheridan's play is patterned after the Russian manner of Meyerhold. Scenery, furniture, and raised revolving dais have been designed by the art students of the eighth grade Junior high at Point Loma. The adaption and execution of these designs is in the hand of Philip Faulconer, sophmore, whose Meyerhold tree clump scene will be unusually artistic.

There will be four scenes staged in "The Rivals" upon the raised revolving dais, with furniture made to suit each of the scenes: a Malaprop scene in pink; an Acres scene in Chinese red and old gold; a Julia scene in blue; and a Captain Absolute scene in green.

Under the direction of Eleanore, their girl stage manager, the boys of the crew are constructing period furniture upholstered in color to match the above scenes. Most artistic units, such as a lyreback chair, a tiptop table, a Chinese Chippendale piece, are being made by Donald Tank, Rodney Maurer, Henry Faunce, Harold Detwiler, and Eddie Gonsalves.

SAN DIEGO FILES APPLICATION FOR PIER

(S. D. Evening Tribune)

Application has been made by the city of San Diego for war department permit to construct a recreational pier extending seaward about 1460 feet from the line of mean high tide at Ocean Beach, according to report by Maj. H. H. Stickney, district army engineer, with headquarters at 751 South Figueroa St., Los Angeles. Drawing showing the location and plan of the proposed construction may be seen at Stickney's office until 11 a. m., April 12. Interested parties are invited to inspect the drawing and to submit in writing, in triplicate, on or before that date any objections based on navigation interests that they may have to the proposed construction. Objections based on other than navigation interests cannot be considered.

School To Celebrate 3rd Annual Nature Day

The third annual Ocean Beach school nature day will be held on Friday, April 12, from one until three p. m. at the elementary school as the culminating event of the Ocean Beach observance of California Public Schools Week. The Nature Days in the past have been the outstanding event of the year for school children and one of the big events of the year for all Ocean Beach residents. This year's event is planned to equal or surpass those of previous years.

Nature Day will be divided into three parts: a garden show, a pet show, and a school nature program. The garden show will be held in the school court, and will consist of a display of the things raised by Ocean Beach children in their home gardens. There will be flowers, plants, vegetables, ferns, and small trees. Prize ribbons will be given to outstanding entries.

The pet show will be held on the school playgrounds. All types of children's pets will be displayed. As in past years there will be dogs, cats, rabbits, guinea pigs, rats, birds, ponies, gold fish and others "too numerous to mention". Prize ribbons will be given for outstanding entries.

The school nature program will be held in the new auditorium and will feature nature plays, songs, and dances, with most of the children in the school taking part. The L1 grade is presenting "Our Nature Dance"; the H1, "Flower Songs"; the L2, "Farmer's Dance"; the L3, "Teddy's Dream"; the H3, "The Milk Fairies"; the H4, "Find the Thief"; the L5, "Bruin's Inn"; the H5, "Flowers"; the H5-L6, "The Humane Society"; the L6, "Birds".

All persons interested are cordially invited to attend the third annual Nature Day. Last year five hundred adults visited the program and an even greater group is expected this year.

Chamber Commerce To Meet April 8th

The regular monthly meeting of the Ocean Beach chamber of commerce will be held at the Ocean Beach Woman's club next Monday evening April 8th, at 8 p. m.

Everyone invited.

OCEAN BEACH WOMAN'S CLUB MEETS APRIL 11

Executive board will meet for a short business meeting in the Woman's club rooms next Thursday, April 11th at 1 p. m. Followed by the regular club meeting at 2 p. m. Department and committee chairman will please have their written reports ready to hand in for the president to prepare her report for Spring convention.

Mrs. Maude Schumacher, chairman of the Garden department, will have an interesting speaker, Mr. Fred Wylie, who will talk on "The Rock Garden."

Election of officers will also be on this date. Mrs. Edith Reich will provide the music for the afternoon.

LOCAL SCIENCE CHURCH APPRECIATES COOPERATION

Sixth Church of Christ, Scientist
San Diego
1929 Cable Street
Ocean Beach, California
April 3, 1935

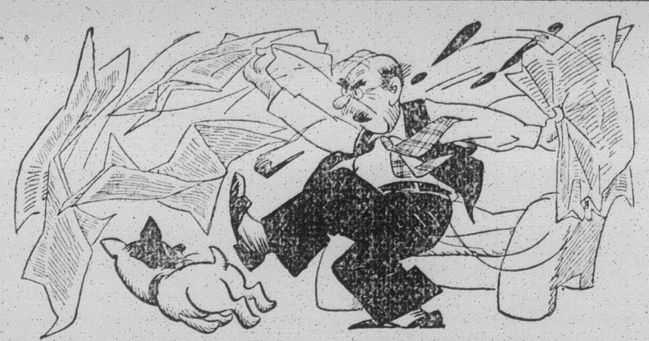
Mr. H. H. Hartvigsen,
Ocean Beach, Calif.

Dear Mr. Hartvigsen:

We express to you and Mrs. Hartvigsen our sincere appreciation for your loving cooperation in helping to make our recent lecture a success.

Our lecturer, Mr. Tomlinson, and many others were greatly pleased that a small paper, like The Ocean Beach News, would print the full text of a lecture.

With very best wishes,
Yours sincerely,
Board of Directors,
(Mrs.) Elizabeth J. Hanna.
Clerk.



Mr. Smith Is Somewhat Wrought Up!

He's just finished trying to cull the worthwhile news out of a dozen dailies, and what is really going on in the world is still somewhat vague. That's the reason for his display of temper. Mr. Smith might have saved himself this emotional outburst if he had read the

Weekly News Review

By EDWARD W. PICKARD

appearing each week in this paper. It covers all the important national and world news, interpreted for you by one of the nation's best known news commentators. Read the WEEKLY NEWS REVIEW each week if you want to keep well informed on current events.

Radio Broadcast To Tell Uninformed

The Ocean Beach community program over XEMO last Friday is reported to have been well received and as soon as warmer weather comes, we shall no doubt have hundreds of visitors at Ocean Beach who have never been here before; also our own citizens will be made to realize the advantanges which we enjoy, that are common to us and scarcely noticeable for we are here every day.

Tell your friends, or write them if in nearby counties or states, to listen in over XEMO 865 Kiloeycles Friday at 3:30 p. m.

The sponsors of this radio program are Kraft's Drug Store, Silver Spray Apt. Hotel and Plunge, Fried's Department store, Bert W. Wenrich, real estate, Strand Radio Co., Sunset Cliffs Service Station & Garage, Ocean Beach Cleaners, Elenia's Beauty Shop, Hotel Ocean Village and Richley Hardware.

New Home and Other Improvement

Along with t he added impetus which is reaching the building industry of Ocean Beach, the Dennstedt Co., is now building a $3600 frame stucco residence and garage for Lewis Whiteside at 4474 Cape May avenue.

Surveyors too have been busy establishing grades and making preliminary plans for the store rooms adjoining Walter Lamb's market and the Bank of America building, on Bacon street, opposite the News office.

The News does Job Printing

CLASS IN ECONOMICS AND HOME MANAGEMENT

Under the auspices of the adult education department a class in home management and consumer buying will be held at Ocean Beach school auditorium Wednesday night. Classes in economics and public speaking on Thursday nights. There will be special speakers on household topics, such as meat and meat products textiles, etc.

The public is invited and there is no cost.

MASONS TO DANCE APRIL 13th

The Point Loma Masonic club assisted by the Eastern Stars will give a dance at the Masonic hall on Newport avenue, Saturday evening, April 13th, to which all Masons and their friends are cordially invited.

Especially good dance music has been a feature of these entertainments and those who like an evening of this graceful recreation should save Saturday evening, next week, and attend.

Exposition Planning Brings Added Interest

An army of 30,000 war veterans will be mustered during the California Pacific International Exposition. On Armistice Day, November 11, 20,000 men of the American Legion and other A.E.F. veterans' organizations will congregate in colorful ceremonies. On May 30, 10,000 members of Veterans of Foreign Wars will attend the Exposition, when the V.F.W. will sponsor a marathon race over a distance of 26 miles 385 yards, the full marathon distance, under A.A.U. rules and regulations.

The starting point will be Agua Caliente and the race will finish at the Exposition.

Another signal event of the Exposition will be the gathering of more than 35,000 Catholics, representing various societies of the Catholic church, who will attend a pontifical high military field mass on Catholic Day, June 2, in which 1,000 persons will take active part.

A religious procession led by massed flags and banners of the societies will be escorted by a Fourth Degree Color guard in uniform of the Knights of Columbus. Two bands will be in the procession.

Following the flags and banners will come the laity of the Church, followed by the Cross bearer, altar boys, priests, monsignori and Bishop John J. Cantwell of the diocese of Los Angeles and San Diego.

Proceeding to the Plaza del Pacifico and thence to the outdoor organ pavilion, the procession will form for the high field mass. A large choir will sing during the services.

Special facilities to handle transportation of these and other millions expected to come to California during the summer are being prepared by railways, steamship lines, air lines, motor coach systems and automobile clubs.

Travel westward from the Mississippi river will be the heaviest since the depression began, according to W. J. Black, passenger traffic manager of the Santa Fe railway, who visited the Exposition grounds to arrange for the Santa Fe exhibit. A new weekly de luxe train will be added to the Santa Fe schedule to handle the greatly increased travel to California during the summer. The world's most powerful locomotive, a $370,000 Diesel unit, will haul this train of 12 cars, starting late in May or early June. The train will be capable of a sustained speed in excess of 100 miles per hour. The 80 air-conditioned cars of the Santa Fe will be increased to 369 for Exposition traffic this summer.

The ladies of the Baptist church will hold a home-made food sale in the Ocean Beach Hardware store, Saturday April 6th, beginning at 9:30 a. m.

SAFEWAY STORE MANAGER JOINS LOCAL KIWANIANS

President Ed Wickern was chairman of the program at Wednesday Kiwanis luncheon with an ambitious program. Songs livened the meeting at the start, then Dad Bingham favored the boys with two short and pithy readings.

Corbet Bennett, former member who has been in Montana for several years, was welcomed as a visitor.

Milton W. Lancaster, manager of Safeway store at 5045 Newport avenue, was inducted into the club by Myron Insko.

Dick Barbour reported progress of the public forums and Dr. Felt reported the club's buying and giving to our local library twenty-five books of fiction.

William H. Westover, lieutenant governor of the 11th Kiwanis district California-Nevada division, was guest speaker and dwelt upon Kiwanis progress, growth since forming twenty years ago and present membership. The encouraging words of the lieutenant governor were heartening to this club of small membership, which he praised for their continued desire to be of benefit in their community.

Harold Kimball, principal of Cabrillo school, was a guest of Dr. John W. Wilhoit.

Next week's meeting will be held Tuesday evening at 7 o'clock with members of the El Centro Kiwanis club bringing the Filmer trophy and furnishing the program.

POINTERS LOSE TRACK MEET AS SANTRY SMASHES RECORD

Point Loma High school's track team showed up well in spots during the Metropolitan league track meet at State College field last Friday, scoring 13 points, but finishing fifth of the eight teams entered.

The league pole vault record fell victim to the dazzling leaps of Bryce Santry, Point Loma's supreme vaulter, who cleared 12 feet 8⅞ inches to better the league mark by 15 inches. His vault also topped the school record of 12 feet even, held jointly by himself and Grant Burrows.

Cunningham of Point Loma finished third in the pole vault competition with a fine leap of 11 feet.

John Silva, sophomore half miler, finished a very close second in his event, threatening the school record of 2:07 held by Joe Shreve. Bob Perlman, sprinter, finished fourth in the 220 yard dash. Bruce Tichenor, last year a pole vaulter, took fourth place in the broad jump. Tony Izuel, showing the best low hurdles form Point Loma has seen since Johnny Clapp set the record in 1930, finished third in a fast race. Victor Winn finished fourth in the 100 yard dash.

The League meet was won by Grossmont high in a close victory from La Jolla High, defending champions.

The CHM class will meet at the home of Mrs. Marie Faree, 4969 Voltaire street, Friday evening, April 5th at 7:30 p. m.

Dr. Hardy Talks About What's Next

Dr. Edward L. Hardy, president of San Diego State College, was the speaker at the Town Forum in Ocean Beach School Tuesday evening.

Dr. Hardy's subject "What's Next" dealt with practically all phases of public and private affairs, we as citizens, should be vitally interested in. Many figures were given from statistics showing trends over the past hundred years in rural schools, city schools, the move of the population to cities from the rural sections. Marriages and divorces compared at various eras, number of women in gainful occupations as well as number of children employed, with statistics to 1930.

The speaker said the children of today should have a general education, varied, not only academic but that it was very necessary to have a practical education as well. He advised the education of adult and youth too, in a general study of living conditions and every day activities in order that they might think for themselves and be able to make up their own minds between right and wrong, for many times the advice of experts, if they were not thoroughly honest, was dangerous to follow.

Many figures and facts were given concerning economics, morals, finances, and a general showing of the peoples of our country.

Aseltine To Speak At School Meeting

Evening Program Wednesday

John Aseltine principal of the San Diego high school and an outstanding educational leader will be the chief speaker at the annual elementary school open house and school program to be held under the direction of the Point Loma Masonic lodge at the Ocean Beach school, Wednesday, April 10, from 7 to 9 p. m. Aseltine's talk will deal with current problems and changes in education in this country and will be of particular significance to people of the Point Loma area at the present time.

The talk will be preceded by an hour open house at which time the rooms of the school will be open for visits by parents and friends. Teachers will be present to discuss school work with visitors. All persons interested are invited to attend.

NEW MALTED MILK SHOP OPEN ON NEWPORT AVENUE

Pat's Malted Milk Shop opened at 5046 Newport avenue Monday and is now ready to serve those desiring a delicious, cool and refreshing drink. This new business will feature giant malted milks, banana splits, fruit cocktails, etc., with prices of these and their ice creams to be found on page 8 of this Ocean Beach News.

The proprietor is A. J. Kilpatrick who has spent several years in this section and is a former Marine.

CURRENT EVENTS PASS IN REVIEW

HUGE NEW ARMY IS ORDERED BY HITLER IN DEFIANCE OF VERSAILLES PACT.

By EDWARD W. PICKARD

©, Western Newspaper Union.

GERMANY, having recently boldly announced that she was now possessed of a military air force in violation of the Treaty of Versailles, still more boldly declares she is no longer bound by the obligations of that pact and proposes to build up an army of about 480,000 men, comprising 12 corps of three divisions each. This was the decision of the cabinet, which decreed compulsory military training throughout the reich. The exact number of men in the army will be determined by a law to be enacted later.

Chancellor Hitler

This was Chancellor Hitler's reply to the action of France's chamber of deputies in accepting Premier Flandin's plan to increase the term of conscript service in the French army to 18 months and subsequently to two years. Germany considered that France was "dealing the last blow to disarmament," and Hitler, rushing to Berlin from Berchtesgaden, directed the action of the cabinet and issued to the German nation a rousing appeal for full support. He declared that the failure of other nations to reduce armament as called for in the Versailles treaty had released Germany from all treaty obligations, and that while the reich had only peaceful intentions, it must re-arm to protect its territorial integrity and maintain the respect of the world as a co-guarantor of European peace.

The Reichsfuehrer stated that Germany did all she could to stabilize peace as evidenced by three facts: She offered non-aggression pacts to all her neighbors; she regulated her affairs with Poland; she showed France that after the return of the Saar there were no territorial questions at issue between France and Germany.

Official London was greatly disturbed by this sudden action of the German government which came just ten days before the date set for a meeting of Sir John Simon, foreign secretary, and Lord Privy Seal Anthony Eden with Hitler in Berlin. The British were prepared to offer abolition of some of the military clauses of the Versailles treaty in return for Germany's adherence to the inclusive plan for European security. But it was feared Hitler would now demand formal recognition of German rearmament, including an army of half a million men, a military air fleet of 1,500 planes and a navy one-third the strength of the British navy. All of which is far beyond what the British peace plan contemplates.

Of course all the world has been aware for some time of the fact that Germany was re-arming. Before the French chamber voted to approve Flandin's project, Jean Fabry, president of the chamber's army commission, stated that the army of the reich had been strengthened in one year from 100,000 to 600,000, asserting the reichswehr had been increased from 100,000 (the treaty figure) to 400,000 and the nominal total of 100,000 police in barracks doubled.

COMPLETE collapse of the administration's long battle to regulate prices in the steel industry is seen in an NRA offer to give up, and in charges by the federal trade commission of a fiasco of collusion. The trade commission insists that price-fixing be scrapped, and no prosecution of steel companies under the anti-trust laws. The trade commission charges that under the code the steel companies have fixed and raised prices on government contracts, in defiance of competitive bidding requirements. Bids were identical, and then steel executives slapped fines of $10 a ton on members who let the government have steel cheaper.

GOV. MARTIN L. DAVEY of Ohio, charged by Federal Relief Administrator Harry L. Hopkins with "corruption" in Ohio relief, went before the state senate and demanded a thorough investigation. He defied Hopkins to come to Ohio for trial on a warrant he had secured charging Hopkins with criminal libel. Hopkins had alleged in a letter that he has proof of "corruption" of relief administration in Ohio including soliciting of funds for campaign purposes from firms that sold relief materials. Hopkins, through C. C. Stillman, FERA regional officer, has taken over administration of Ohio relief. Department of Justice attorneys in Washington declare they stand ready to defend Hopkins, but there was no indication that Hopkins would go to Ohio, although he may change his mind. The spectacular blowup is said to have had its inception in the 1934 political campaign. Davey made campaign speeches charging that Ohio relief was mismanaged, and particularly aimed his barbs at Cleveland. This irked Cleveland leaders since relief there had been administered through a non-political group, which later became the official Cuyahoga county relief administration. Hopkins often took note of the fact that Cleveland's relief committee was "one of the best in the country." Later Davey pledged himself not to touch the Cleveland organization, but is said to have ousted several members, and repeated old charges. Cleveland leaders took the fight to Washington.

RUMBLINGS from Russia declare that Germany is concluding a military pact with Japan. Gen. Sadao Araki, former Japanese minister of war, it is claimed, is going to Berlin soon to discuss terms. Official warning went out over Russia that "war may break out unexpectedly at any moment." Michael Kalinin, president of the all-Russian central executive committee, made this blunt statement in an address before organizers of the Soviet cavalry, and it was later broadcast over the republic. He blamed conditions on "the present political whims of the dominating classes of capitalistic countries." He said:

"It is not necessary to prove that the Soviet Union is against war. No other government in the world ever manifested a desire for peace more than ours."

COMPROMISE and White House pressure brought about the defeat of the McCarran "prevailing wage" amendment to the work relief bill in the senate, and administration leaders were confident that the measure would be laid before the President for signature within a few days. The deadlock over the amendment was broken when Senator Richard B. Russell, Jr., of Georgia proposed a substitute which leaves the President free to pay "security wages," officially estimated at $50 a month, provided they do not adversely affect the wage scale in private industry; and providing that the prevailing wage must be paid on all permanent federal building projects. This way out, which had been approved by the White House, was accepted by the senate by a vote of 83 to 2, after the McCarran amendment had been defeated, 50 to 38. The two votes against the compromise were cast by Metcalfe of Rhode Island and Hale of Maine, both Republicans. Before the vote on the McCarran amendment was taken Senator Glass announced he was authorized to say that if it prevailed President Roosevelt would veto the measure.

There remained many obstacles over which the relief bill must be pushed, for the regular Republicans and a considerable number of Democrats were determined to alter it materially. Several senators favored cutting it down by three or even four billions; and La Follette of Wisconsin wanted the total increased to ten billions. Inflation and bonus enthusiasts also planned to attach riders.

THE house appropriations committee favorably reported out the Department of Agriculture appropriations bill for the 1936 fiscal year. A cut of $513,878,758 was due largely to a $411,022,428 slash in the AAA item. The total bill calls for $653,278,758, of which $570,000,000 would go to the Agriculture Adjustment administration activities. At committee hearings it was explained that it is impossible to estimate how much would have to be obligated because of the crop control program, but the AAA item was a rough estimate of processing tax collections and is not controlling. Henry Wallace, secretary of agriculture, told the committee that the farmers' share of the national income is now about 10.2 per cent, and should be 13 to 16 per cent.

Sec'y Wallace

Wallace said "true prosperity" cannot come "until there has been a very material increase in the output of physical goods, industrial goods."

"If in some way it were possible to turn out 50 per cent more industrial goods at a price definitely lower than the present price," the secretary testified, "the result would be to make it possible for agriculture to buy more with the agricultural dollar and there would be more factory workers to be fed in the cities."

COUNTERFEITERS, narcotics dealers, bootleggers and other violators of federal laws were given a tremendous shock and many hundreds of them were thrown into jail when the government opened up an anti-crime campaign that covered the entire land. The initial raids, made without warning, were immensely successful, and it was announced they would be continued indefinitely. Twelve thousand federal officers took part in the operations, and besides the individuals captured, millions of dollars worth of contraband was seized.

The drive was described by treasury officials as a test of the advantages of concerted action by all enforcement agencies coming under its supervision. Such a campaign was planned as early as last summer when a "crime co-ordination committee" was formed, under the leadership of Harold N. Graves, special assistant to Secretary Morgenthau.

WILEY POST'S second attempt to fly from Los Angeles to New York through the stratosphere in record-breaking time ended at Cleveland, where he was compelled to come down because his supply of oxygen was running short. He said he would have "passed out" in a few minutes if he had not descended to breathable air. Post is convinced that only this trouble prevented his making the transcontinental flight in seven hours and 40 minutes, and he declared he would soon try again. His unofficial average speed to the Cleveland airport was 279.46 miles an hour.

GREECE is mopping up the loose ends of the revolt. Some fighting is reported near the Bulgarian border where one regiment, part of the rebellious Fourth army corps, has declined to surrender, but the revolution is definitely over. Eleutherios Venizelos, ex-premier, and leader of the futile revolt, was reported a refugee at Rhodes, the tiny island where Julius Caesar was interned by pirates some 2,500 years ago. Venizelos was transferred there by the Italian government after he had been landed in Italy by one of the rebel warships. Gen. George Karmenos, rebel commander, is safe in Bulgaria, where officials have refused extradition. Rebel prisoners are being concentrated in camps, and courts martial are functioning in Saloniki, Kasala and Larissa, and military trials have begun in Athens.

THE President's special message calling for abolition of utility holding companies stirred up a storm that probably surprised even such an astute politician as Mr. Roosevelt. The President urged legislation to abolish these holding companies which were unable to show they were operated in the public interest. Representative Bertrand H. Snell, Republican leader, immediately attacked the message, claiming the President had denounced propaganda against the proposed legislation, and was himself propagandizing for it. Utility companies also swung into the battle and thousands of investors in utility stocks are reported to have sent in protests to congress. In the senate, Norris, Nebraska Republican, offered a resolution calling upon the federal trade commission to investigate propaganda regarding the legislation. The senate approved, without debate. Charges were made by utility companies that because of the administration's campaign against public utilities "the values of utility securities has declined by three and one-half billion dollars since 1933." Enactment of legislation to halt holding companies, will cause enormous loss to the American family, one power official testified before the house interstate commerce committee.

Senator Norris

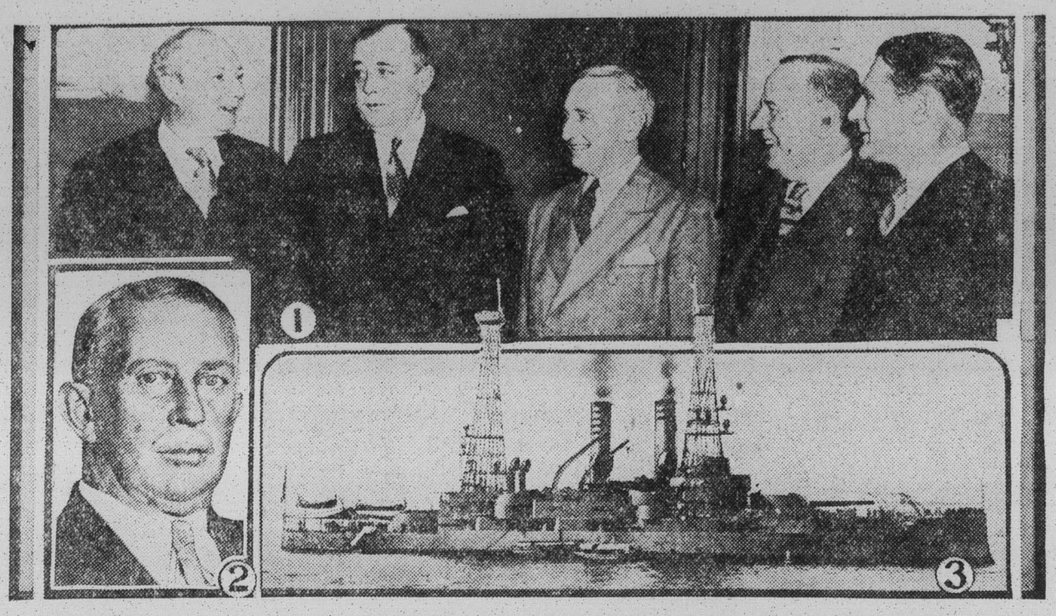
THE senate smacked down Senator Huey Long for his filibustering tactics and his efforts to amend the administration's $4,880,000,000 work relief measure. The Kingfish had demanded alterations in the work relief bill which would take $100,000,000 away from the $600,000,000 earmarked for CCC work and allot it to students in colleges and universities. Long's amendment was defeated by a vote of 58 to 27. To prove that old adage of "politics makes strange bedfellows," Long was aided by Senator Hiram Johnson of California, who declared that the senate should have something to say about methods for spending the huge sum sought by the President. Johnson has heretofore been considered a supporter of the President. Long's amendment brought forth other proposed changes which should keep the senators busy arguing for several days. The bonus bill may be dragged in and an attempt made to make it a rider to the relief measure, and inflationists and leaders of other "ists" will insist on having their say.

ALL outstanding first Liberty loan bonds have been called for redemption by Secretary of the Treasury Morgenthau. The $2,000,000,000 outstanding has been called for June 15, before which time the treasury will likely offer lower interest-bearing securities in exchange for the first Liberties, saving the government some $14,000,000 in annual interest charges.

NEW DEAL policies took two more batterings as Federal courts held both the AAA and NRA unconstitutional as regards intrastate business. The administration might find some consolation in another ruling which held the radical Frazier-Lemke farm mortgage bill was valid. Federal Judge Merrill E. Otis, at Kansas City, declared the Frazier-Lemke law was constitutional, "although unwise in many of its provisions and almost incomprehensible matter." Judge Otis said his ruling was not the first in which the act was upheld, and that an appeal was already before the United States Supreme court and a decision might be expected shortly. The AAA was declared invalid as regards intrastate business by Federal Judge Ira Lloyd Letts at Providence, R. I., who issued an injunction restraining Secretary of Agriculture Wallace from enforcing the act against three Rhode Island retail milk dealers, on the grounds that their business was conducted entirely within the state, and the national government had no right to interfere. At Newark, N. J., Federal Judge Guy L. Fake ruled the national recovery act unconstitutional as applied to intrastate commerce "because it attempts an unlawful delegation of legislative authority." The latter decision agrees with that handed down by Federal Judge Nields in the controversial Wierton steel dispute.

PRESIDENT ROOSEVELT clashed with veterans over immediate payment of the two billion dollar bonus, and through Chairman Harrison of the senate finance committee, announces he will veto the Patman or Vinson bills if passed. The President, it is said, will not compromise, but is prepared for a "no-surrender" fight. The house rules committee has approved the Vinson, Patman and Tydings-Cochrane bills, and the big battle is ready to begin.

Senators Delve Into NRA Investigation



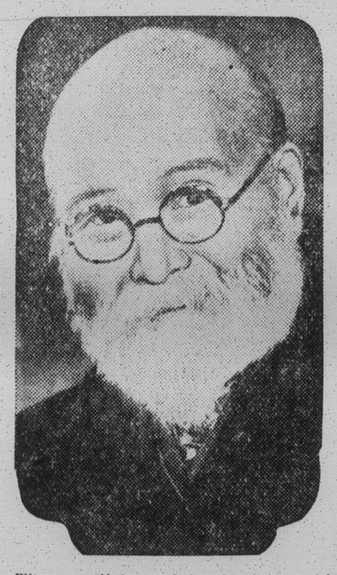
In The News: 1—Senatorial investigation into NRA gets under way. 2—Anning S. Prall of New York, who has been named as chairman of the federal communications commission to succeed Eugene O. Sykes. 3—Former American warship, sold by the government to Greece, has seen active service in conquering rebel Greek warships and finally putting down the revolt.

Finance Group Takes Up Quiz

The senatorial inquiry into the NRA gets under way in Washington in the finance committee headed by Senator Pat Harrison (Dem., Miss.). Success of the administration in steering the investigation into the hands of this committee headed by a staunch supporter of the New Deal is hailed as a victory by friends of President Roosevelt's program.

Shown above in session are Senator Harrison; S. Clay Williams, chairman of the NRA board; Senator Walter F. George of Georgia; Senator Bennett Champ Clark of Missouri; and Senator Gerald Nye of North Dakota.

JAP FINANCE MINISTER



The owlish, eighty-three-year-old patriarch and veteran of Japanese finance, Korekiyo Tahahashi, poses for this picture in his Tokyo office, after approving the governmental budget for 1935. He is the finance minister of the Okada government now in power.

TAKES CHARGE

Perturbed by charges that Communists have obtained employment in the Washington navy yard, Secretary Swanson has decided to take personal charge of the investigation.

Secretary Swanson

Investigation of the activities of these Communists is in full swing, Swanson said, and he will pass on each individual case.

The naval investigation already has disclosed that Communist forces either within the navy yard or from the outside have been distributing subversive literature to the workers.

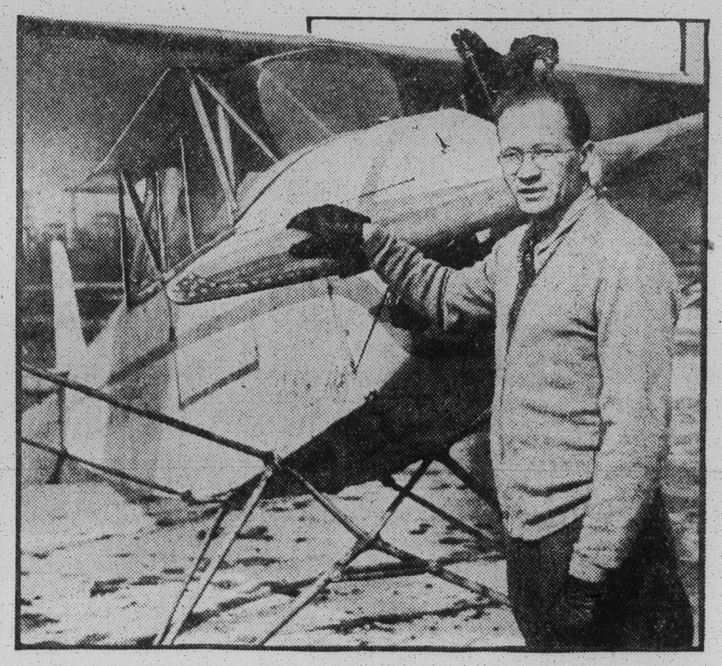
50,000,000 Cans of Beef Aid

Austin, Texas.—Fifty million cans of Texas beef have gone to relieve suffering this winter, state relief officials report.

Now Deaf May Hear Through the Skin

Prof. Robert H. Gault of Northwestern university demonstrates his telestractor on Harry Goddard, who is deaf, as Mrs. John A. Wolfer looks on. Doctor Gault's device, representing eleven years of research, works on the vacuum tube principle of the radio. Amplified sound waves are transmitted to the finger tips through a metal disk, enabling the deaf to hear through the skin.

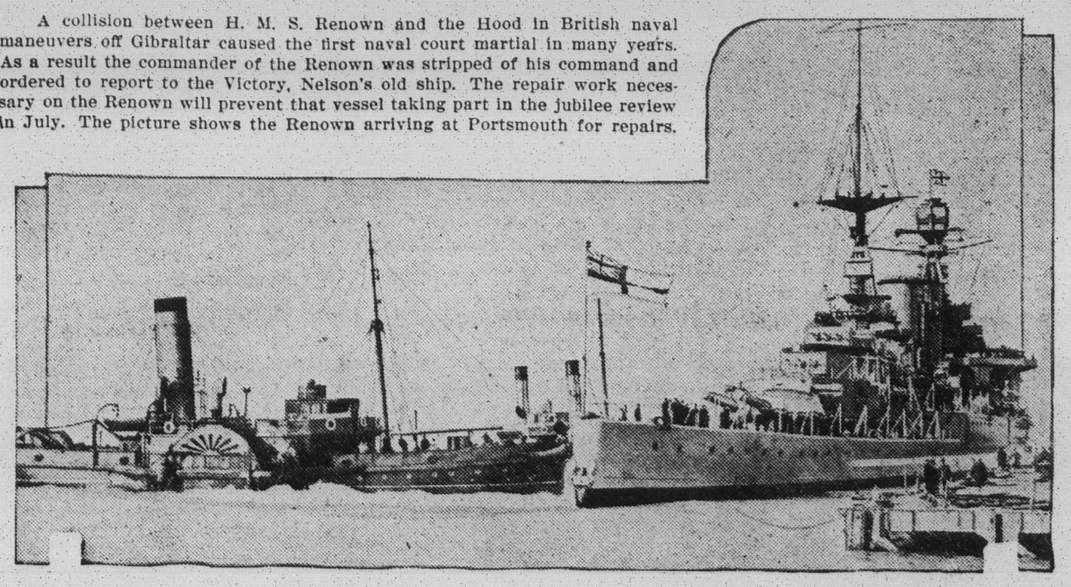
He Learns to Fly in 55 Minutes



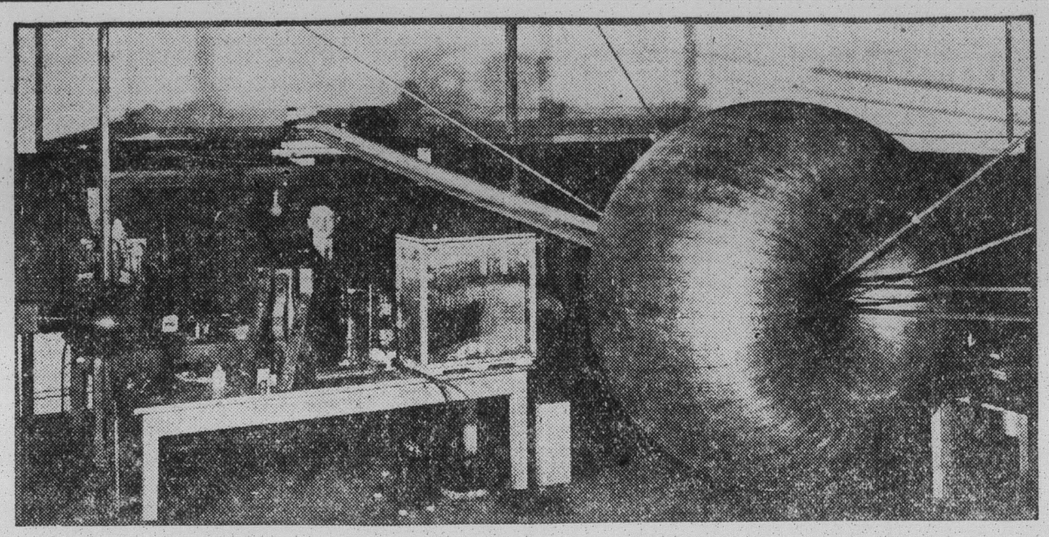
After 55 minutes of instruction, Herbert Sargent, twenty-two, of Jersey City, made his first solo flight in a plane at the Jersey City airport and after completing the prescribed maneuvers set his plane down for a three-point landing. Eddie A. Schneider, twenty-three, Sargent's youthful instructor, holder of the junior transcontinental flying record, said he allowed Sargent to go up alone because he handled a plane perfectly. Taking the air on such short instruction is believed to have brought to Sargent a new record.

Collision Costs Her Commander His Job

A collision between H. M. S. Renown and the Hood in British naval maneuvers off Gibraltar caused the first naval court martial in many years. As a result the commander of the Renown was stripped of his command and ordered to report to the Victory, Nelson's old ship. The repair work necessary on the Renown will prevent that vessel taking part in the jubilee review in July. The picture shows the Renown arriving at Portsmouth for repairs.



Newly Designed Doughnut Million-Volt Generator



DR. WILLARD H. BENNETT of Ohio State university's physics department, with his newly designed doughnut million-volt generator, for use in the study of nuclear disintegration. Because it is much smaller and less costly than the models previously used for the same voltage, the new generator is expected to greatly increase the possibilities for study of the atom and its nucleus. The generator will be used in operating a high vacuum tube at extremely high voltages, to produce high-speed particles which disintegrate nuclei of atoms and change the chemical elements. The new generator is of the electrostatic type and has a high voltage shield in the shape of a sphere with two holes on opposite sides. The shield is charged by means of a silk belt which passes through these holes.

THE GIFT OF FRIENDSHIP

By ANNE CAMPBELL

MY FRIEND came home from far away,
And brought a gift to me.
But in my hand no bauble lay,
And there was nothing I could see.

She gave to me a cheering word,
A happy smile, a loving glance,
And in my heart new courage stirred
To conquer changing circumstance.

There is no gift that can be bought,
Or any work of art,
As precious as the one she brought;
The beauty of a friendly heart.

New Style Creation

The "Smart Set" of hat, gloves and bag combining beige and black is worn with a novelty weave woolen dress. The hand stitched hat is felt, trimmed with grosgrain ribbon; the gloves and bag suede with silk faille.

Alterations in Place Names Not Infrequent

How folks in a community will change the real name of a place, a river, mountain, etc., by gradual differences in spelling and pronunciation, is brought out on "Uncle Sam's Handbook on Geographical Names," published by the United States Geographic board.

Sometimes the natives will entirely reverse the proper name of a place, by carelessness or as a joke over a long period. Horse Creek in California, for instance, is now miscalled Cow Creek. Breteche Creek, Wyoming, has been called Britisher Creek a long time, perhaps because it sounds like that.

The board found that the word Ozarks was corrupted from the French words Aux Arcs, pronounced exactly the same way.—Washington Post.

QUESTION BOX

by ED WYNN, The Perfect Fool

Dear Mr. Wynn:
I am not one of those persons who believes everything told them. For that reason I am writing to you to find out if what I heard last night is true. I heard that the richest people in New York neglect their children. Tell me, is this true?

Yours truly,
ANN ARKIST.

Answer: What you heard is silly. Rich people do not neglect their children. They engage nurses to do that.

Dear Mr. Wynn:
What is meant by "A Gentleman Farmer"?

Yours truly,
Q. KUMBER.

Answer: A gentleman farmer is a man who raises nothing but his hat.

Dear Mr. Wynn:
During our natural history lesson, in school yesterday, our teacher said that about 8,000 elephants go every year to make white keys for pianos. If this is true, what do you think of it?

Sincerely,
E. KLIPSE.

Answer: I think it shows how far we have advanced in training animals.

Dear Mr. Wynn:
What is meant when they say a man has "horse sense"?

Truly yours,
JOCK KOY.

Answer: "Horse sense" is the thing which keeps a man from mortgaging his home to buy an automobile.

Dear Mr. Wynn:
My mother and father had an argument. Ma said that Pa doesn't act the same as he used to before they were married, especially if they were on a train and passed through a tunnel. Why should men act differently, in a tunnel after marriage?

Sincerely,
I. M. A. MAY DIN.

Answer: Before marriage a fellow always kisses his girl in a tunnel. After marriage, when he gets in a tunnel, he takes a drink.

Dear Mr. Wynn:
I saw a policeman stop an automobile and arrest the driver. The man wanted to know why he was arrested and the policeman said because he had only one eye. What charge can they place against a man driving a car because the man has only one eye?

Yours truly,
D. SEMBER.

Answer: He was probably arrested for driving because he had one lamp out.

Dear Mr. Wynn:
In an article I read in one of the morning papers I saw the following headlines: "Robbed by Comic-Opera Bandits." What in the world is meant by "Comic-Opera Bandits?"

Truly yours,
C. NARIO.

Answer: That means robbers who, after tying their victims so they can't move, use "Old Gags" to keep them quiet.

Bedtime Story for Children

By THORNTON W. BURGESS

REDWING THE BLACKBIRD GIVES WARNING

CREEPING toward sleeping Danny Meadow Mouse Reddy Fox managed to keep quite out of sight of anyone in the Smiling Pool. But there was one person to whom Reddy gave no heed. In fact, Reddy did not see him at all. It was Redwing the Blackbird, sitting on top of an alder tree on the bank of the Smiling Pool. Redwing had not seen Reddy until the latter had almost reached the Smiling Pool. Then, happening to look in that direction, he had caught a glimpse of something red moving in the tall grass. You see, he was looking down and therefore could see what those on the ground or in the water could not see.

Now Redwing does not fear Reddy Fox. There is no reason why he should. But Redwing has no love for Reddy Fox. He knows that Reddy would gladly catch him if he could. So the instant he was sure that it was Reddy creeping through the tall grass, Redwing flew out directly above Reddy and began to scream. "Danger! Danger!" he screamed. "Here is Reddy Fox! Danger! Danger!"

At the first warning note from Redwing, Grandfather Frog dived into the Smiling Pool with a great splash. There wasn't any real need for him to do so because out on that big green lily pad of his, he was quite safe from Reddy. But Grandfather Frog always feels more comfortable in the water when any kind of danger is around. All along the shore of the Smiling Pool, half grown young frogs dived into the water in a panic. They knew what had brought Reddy over to the Smiling Pool.

Of course at the first note of Redwing's voice the eyes of Danny Meadow Mouse flew open. The instant he saw where Redwing was hovering in the air as he screamed he knew that Reddy Fox was just beneath him and that meant that Reddy was right back of Danny himself. What should he do?

He Had Caught a Glimpse of Something Red Moving in the Tall Grass.

Where should he run? To turn back would be to run right into Reddy's mouth. There wasn't a hiding place near. It was useless for him to try to outrun Reddy, for Reddy could catch him in two jumps. Was ever a meadow mouse in a more dreadful position? There was Reddy Fox behind him and the Smiling Pool in front of him. To Grandfather Frog, whose big goggly eyes showed just above the surface of the water, it looked as if Danny Meadow Mouse would soon be no more. He couldn't see one little chance for Danny to escape.

MOTHER'S COOK BOOK

LABOR-SAVING IDEAS

WHEN making pastry prepare more than is needed and place in a cold place or ice chest, tightly covered with waxed paper. The thoroughly chilled mixture makes more flaky crust than that baked at once. From this pastry a few tarts may be made in a hurry, or cheese straws, a meat pie, using left-over meat.

Ice box rolls are another special that can be mixed and left in the ice chest for a week. Take off just the amount needed for rolls and put them to rise; when light, bake. A tin of delicious rolls are quickly served. An hour or two before baking make them into small rolls and keep very warm, tightly covered. It is better to grease them well with lard—that keeps the flour from drying out on top while rising. They should be more than double their bulk when put into the oven.

When baking potatoes prepare enough so that the next day a few will be available for cream potatoes. They are fully as good as those freshly cooked.

By keeping jars of chow chow, capers, olives, pickles as well as cheese, celery, anchovies and numerous other condiments and relishes, one has access to delightful fillings for sandwiches which need to be made in a hurry. A jar of mayonnaise and a bottle of french dressing should be made in such quantities that they are always available. It takes very little extra effort to double the amount when preparing a salad dressing, and then there is always a supply.

Wash the heads of lettuce and place in a cloth or covered dish in the ice chest, then the lettuce will always be ready for use. Parsley well washed, leaving the moisture clinging to the leaves, if put in a fruit jar tightly covered, will keep two weeks, fresh and green. Add a bit of water if it seems to dry out.

Inferiority Complex Needed

If you want to succeed in life, cultivate a good, healthy inferiority complex. It is something to be cherished and held, observes a writer in Pearson's Weekly. You ought to feel awed and silent when you stand before a great work of art, or in a beautiful building. You ought to feel moral inferiority when you contemplate the lives of some great men. You ought to feel awe, reverence and respect—they are the three qualities the world needs today.

MINUTE MAKE-UPS

By V. V.

Ears have come out of hiding! You must pay attention to them and consider them in your make-up problems. After all, they are a part of your face and show most to advantage when they look pink and shell-like. A pink liquid powder over them will add color and make them blend with your complexion make-up.

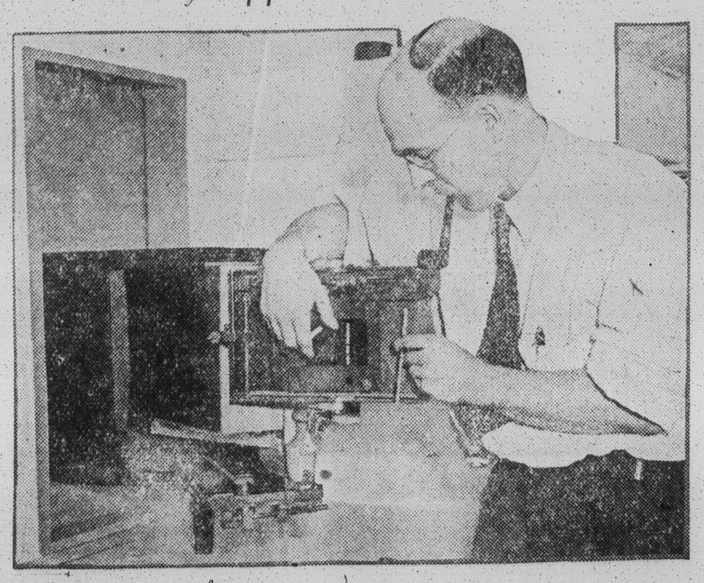
Death Ray Apparatus Aids Human Life



DR. E. D. McALISTER of Smithsonian institution is photographed with his death ray apparatus. Using ultra-violet—invisible light—rays from a quartz spectrograph, he determines what wave lengths are lethal. As it is adjusted it is lethal to asoarids (intestinal parasites). This machine, operated with a radiation wave of from 3,900 to 1,850 angstrom units, is lethal to many organisms. An angstrom is ten-millionth of a millimeter.

Firestone

GROUND GRIP TIRES

THAT 6,000,000 FARMERS NEED FOR THEIR CARS, TRUCKS AND TRACTORS TO PULL THEM THROUGH MUD, SAND OR BAD ROADS OF ANY KIND

YOU don't need chains, for these Ground Grip Tires will pull you through where chains would leave you stranded in mud or sand. Firestone Ground Grip Tires for motor cars, trucks and tractors give the farmer greatest economy ever offered, and relief from being stranded on mud roads and in soft ground.

Why can Firestone give you these wonderful new tires with the wide tread that withstands this terrific pull and strain, and still does not destroy the cord body? Firestone can do this because the body of this tire is built with Gum-Dipped cords. Underneath the tread, the patented construction feature of two extra layers of Gum-Dipped High Stretch cords gives extra adhesion of the tread to the cord body, enabling Firestone Tires to hold on this heavy, tough, scientifically designed tread. This tire cleans itself on any kind of clay or soft ground, and the tread projections have been so placed, that they are always in contact with the road, doing away with any bumping.

You cannot afford to be without these tires on your trucks and passenger cars. If your tractor is not equipped with rubber tires, see your nearest Firestone Service Store — tire dealer or implement dealer, and learn how easy it is to make the changeover. Get our prices on a full line of tires and auto supplies.

JOIN IN OBSERVANCE OF PUBLIC SCHOOLS WEEK

Next Monday, April 8th will open Public School Week under most favorable and painstaking preparation. Continuing throughout the school week, it will culminate with a grand demonstration participated in by both parent and teacher under the auspices of the PTA. It is a long looked-for annual event full of anticipation and in its 16th year. Out of this influential gathering both homes and schools will be brought together in a closer union for co-operation. Greater educational advantages is the goal and already there is marked enthusiasm. At last year's observance nearly one-fifth the total adult population of the State was represented in attendance either at public meetings in the various communities or in visits to schools. Exhibits of the work of pupils in various schools as usual will be a feature of the week this year.

Public education is the cause of the strides this nation has made in the development of its natural resources, and the more rational spiritual concepts of the masses. The bank, the factory, the mine, our distributing agencies, our insurance companies, our modern transporation facilities and electric power, are the implements of the development of our natural resources. Many of these private activities have been helped from the Federal Treasury. Many are now being helped. Hundreds of millions of dollars from the Federal Treasury are annually going into public roads, dams and other physical improvement in the states—all indicative of social progress due to education. Must education, therefore, starve while these agencies are succored and sustained? Is our civilization, from which heights many have taken heart for an envisioned approach of finer and richer things for mankind, to falter in its duty to the living, to posterity unborn and to the great souls who have sacrificed and wrought for the bell-being of the race? Is our civilization to canker and rust in a sordid glory of materialism? Are the higher endowments of the mind to be, again, only the privilege of the rich and those whom they would patronize?

Our public education is fought by certain ecclesiastics and others in high places. It is ignored by many who send their children to private schools. The time for the people to stand firm for support of the public school is now. They have created the wealth. By virtue of long-fought battles in the past, they obtained the right of ballot. Their paramount duty to themselves, to posterity and civilization is to use the power of the ballot to obtain proper and adequate support for public education by taxing that wealth.

These are the questions that confront every citizen whose heart throbs with the moral feelings of the great souls of yesterday, today and for all time.

• • • •

One of the most outstanding needs for discussion today, is subjects with something more tangible to build upon. We are too much "off on a tangent" over the unaccountable portions of life. Instead of considering questions on cultural facts, political enconomy, professional, educational, social, honest business and recreational topics, too often many find satisfaction in gossip, slanderous expression, boastings or jealous sentiment. It is easy to pick a quarrel and the after-effect poisons the finer instincts and paralyzes any good influence we may hold. It is wisdom to choose the enduring things that strengthen character. Strength and gentleness go hand in hand according to DeSales, for he says, "Nothing is so strong as gentleness, nothing so gentle as real strength." Each mistake should be a stepping stone to nobler achievement.

• • • •

Nature never asks only small praise in return for her bounties. This is one of the inexorable rules for man to remember. She never deserts her devotees. If we study the obituary column and see the death toll of a day, it is surprising the large number who fall by the wayside because of ill health. Diet, perhaps, is the direct route to health; ignorance is a dangerous condition, then, for millions eat without regard to the health elements of food, or the correct combinations of food for deriving health. We Americans "cap the climax!" We are known to head the list of careless eaters. The poor stomach is forced to over-work when it should be on relief or resting.

• • • •

There is an old saying that the welfare of capital and labor is interdependent and neither can permanently prosper unless it helps the other. What a day of industrial peace it would be if this formula could be put into practice. Within the past fifty years, this nation has never been without the labor wage fight. There will never be any relief until we get, not only satisfactory wage agreements, but a friendly co-operation between employer and employee, and all comes from the age-old monster, greed. Experience proves that nothing is gained through strife, either for employer or employee; solution of differences rests in earnest striving for equity.

• • • •

If we endeavored to understand others as we wish them to understand us, there might be less neighborly dissension. The sage old rule is still in effect, that we forget too quickly the meaning of a familiar and friendly relation to others, especially those whom we often depend upon in business life. Competition has had a grievious effect on too many, especially where co-operation is needed for improvement. A smile costs little, but it earns a big dividend. A smile can do marvelous things—it can blossom into a rose of glee for the other fellow.

• • • •

Self-sufficiency is quite a rare accomplishment—when body and soul has reached a degree of contentment with nothing to harass or mar. We are all working for that goal, but very few reach it. It might be the ruination of most people, for what is more selfish than to be satisfied with yourself irrespective of neighbor, friends or conditions? Some one has said that the country is poor in wealth and rich in poverty. You can take the expression either way you choose, but there is a depth of meaning back of it.

One answer to "old age insurance"

If you have a good job—*one* logical answer to your problem of old age security is—a Bank of America savings account started right now and added to regularly. Interest compounded twice yearly, will add substantially to your savings. See the New Accounts man at any Bank of America branch.

SPEED counts—whether your flight is on skis, on the new streamline trains, or whether it's mental speed. But in order that your haste shall not make waste, see that your family meals have plenty of energy foods to repair the tissues which are used up in your hurry.

It doesn't need to be a meal that costs a lot. Here is a dinner that will take a family of four a long ways. It costs a dollar.

Baked Pork Chops with Relish 35¢
Baked Carrots and Peas 16¢
Apple Sauce Relish 13¢
Corn Sticks 12¢
Baked Custard 17¢
Coffee 7¢

Baked Carrots and Peas: Slice or dice two carrots and place in buttered dish with one-fourth teaspoon salt and a few grains of pepper. Add one-half cup liquor from one No. 1 can of peas. Cover and bake one hour in a moderate oven—375 degrees. Fifteen minutes before removing from the oven, add the drained peas from the No. 1 can. Add two tablespoons butter just before serving. This is also a delicious luncheon dish.

Apple Sauce Relish: Mix one cup of canned apple sauce and three tablespoons horseradish. Chill. Just before serving fold in one-third cup of cream which has been whipped. Serve as a relish with the pork chops.

Says Townsend Plan Will Not Benefit All

In your paper dated Friday, March 29, 1935 there is a piece by John G. Thomason showing the Townsend Plan as the way out of our depression. He is making the mistake of so many of the people who favor the plan, and show that they are not in a position to understand the world economics, and so see the lack of increase of employment and the lack of improvement that will take place if such a plan was to be made law. Would there be the increases they claim?

If an old person who received the pension were to buy a new Ford, he would pay around a thousand dollars for it, and thus there would not be so many sold as is supposed with the cash to spend every month. Meat would cost around fifty cents a pound, and there would not be the increase in use that appears on first thought, and the farmer that produced that meat would not get more than he is now, for his hog or steer. He would have to pay the high price of getting anything he buys to him, however. This list can be made to cover everything sold.

You will probably say that my figures are high, let's see. We will go back to the automobile:

There is the first tax on ore sold for the various metals at say "2%" to the sum of this is the tax on the smelted material, to this sum, the tax to be charged for the refined metal, to this sum, the tax for the sale of the metal to the, we will say, steel mill that makes the rough steel, to this sum, the tax on the sale to the manufacturer of the car, to this sum, the tax on the sale to the distributor, and to this vast amount that has finally been built up, the tax on the sale to the individual.

You will see from the above, that in fact, the tax will largely counteract the many benefits supposed to acrue from a pension that revolves as the Townsend Plan is to do.

Now, there are the products that will come in and be sold that are made outside the United States. Tariff walls so high that retaliation would kill our chances for export to foreigners, would have to be erected, and the crying need today is a market for our manufactured products, so as to put more people to work.

The Townsend Plan would not, as the above shows, enable many more to get jobs, and the cost of living would be enormously increased, so there would not be the help to the less well paid that is fondly hoped, and the fathers and mothers would not have so much to give to a younger, and fast becoming dependent generation. This last sentence tells the story of much "evil" desire for such a pension law.

A MIGHTY LITTLE SOLDIER MARCHING STEADILY ALONG

Is it a sign of recovery, when food product prices are on the rise? Studying statistics, one might say that with the manufacturer, conditions are improving. For instance, the cigarette factories are running full time and then some. Last year was a humdinger for output, with increasing demands in the checkup. Cigarettes, almost by the billion are consumed daily. For the first nine months of 1934, maufacturers produced 95,956,286,979 cigarettes. This is the highest output of record; the next highest being in 1930, or 92,051,472,821.

This year is going to surprise the nation with the demand for the little white roll that is a hip-pocket habit—also a hand-bag habit and the latter is in a heated race with the former.——

GOLDEN PRODUCTION OF CALIFORNIA CITRUS

California is yielding an efficient hand in developing the citrus growing and producing industry. The growers last year did a gross business of over $683,282, disposing of 62,209 tons of oranges and lemons. This tonnage represents what might be regarded as the surplus of exchange growers, and is the amount that would have found no market as fresh fruit. It includes all the small and low-grade fruit and was converted into essential oils, pectin and bases for the flavoring of carbonated beverages, none of which compete with fresh fruit drinks. From the waste of this comes another by-product, dried orange meal for cattle feed. Every year the citrus grove is becoming a greater commercial asset, and is no longer considered a asset, and is no longer considered a luxury, or the rich man's estate.

Much Disputed Assembly Bill 428

An act to add sections 1611 to 1617, inclusive, to the Political Code, relating to the State Board of Recreational Harbor Commissioners for Mission Bay, and to repeal certain acts in conflict herewith.

Section 1. Section 1611 is hereby added to the Political Code to read as follows:

1611. There is hereby created a State Board of Recreational Harbor Commissioners for Mission Bay (also known as False Bay) in San Diego County. The board shall consist of five members who shall be appointed by the Governor and who shall be residents of the county of San Diego. The members of the board shall not receive any compensation for their services as such members, but they shall be reimbursed for their necessary traveling and other expenses incurred in the performance of their official duty, such reimbursement to be paid from the Mission Bay recreational harbor improvement fund, and not to exceed the sum of one hundred dollars in any one fiscal year. The term of commissioner shall be four years. Upon the expiration of any term or if a vacancy should occur, the commission shall nominate a successor or successors, to be appointed by the Governor. An appointment to fill a vacancy shall be for the unexpired term. Immediately after appointment of the first members of the board the members shall decide by lot their terms of office so that two members shall serve for two years, two members shall serve for three years, and one shall serve for four years. Special meetings of the board shall be on the call of the chairman or of any three members.

Sec. 2 Section 1612 is hereby added to the Political Code to read as follows:

1612. The board shall annually elect a chairman who shall be the executive officer of the board. The board may employ such engineers, attorneys, assistants, stenographers, and other assistants as it deems proper, and fix their fees and compensation, which shall be paid from the Mission Bay recreational harbor improvement fund. The board shall have all necessary power and it shall be its duty to create, maintain, develop and improve and administer Mission Bay as a recreational harbor to be used for the pleasure and recreation of the public for boating, fishing, and bathing, and for any other recreational purpose. No industrial activities shall be permitted on any pier, wharf, jetty, or breakwater, or any portion of the property, under the jurisdiction of the board, except such commercial enterprises which will, in the opinion of the board, be conducive to the pleasure and aid in the recreation of the people in the use of the harbor. The board shall develop and administer the bay, submerged tidelands and other works and facilities for the purpose of carrying out its purposes and functions.

Sec. 3 Section 1613 is hereby added to the Political Code to read as follows:

1613. There is hereby created a special fund to be known as the Mission Bay recreational harbor improvement fund. All moneys received by the State Board of Recreational Harbor Commissioners for Mission Bay shall be paid into said fund. The State Treasurer shall keep an accurate account of all moneys received and paid by him in connection with such fund in books kept solely for that purpose. Payments from said fund shall be made only the order of the State Board of Recreational Harbor Commissioners for Mission Bay.

Sec. 4. Section 1614 is hereby added to the Political Code to read as follows:

1614. The board shall have the power to prepare plans and specifications for the creation and improvement of the harbor of Mission Bay, and such plans and specifications shall be prepared and executed in accordance with the manner provided by law for the erection of county buildings. In carrying out any work under any of the relief fund acts of the United States or the State of California or any political subdivision or any municipal corporation, the board need not ask for or advertise for bids. The board is authorized to accept aid from the Government of the United States and from the State of California and of any county, city in county, city or district in the State of California or from any person, corporation or association, to be used in the administration, creation, improvement, or maintenance, of the recreational harbor of Mission Bay. The board shall have the power to accept gifts of real or personal property under such terms and conditions as it considers proper, to buy or sell personal property or to acquire such interest in real or personal property as may be necessary to carry out its functions.

Sec. 5. Section 1615 is hereby added to the Political Code to read as follows:

1615. The board shall have jurisdiction and authority over all state-owned waters and tidelands of Mission Bay, and all land acquired by the State pursuant to the provisions of Chapter 811, Stats. of 1929.

Sec. 6. Section 1613 is hereby added to the Political Code to read as follows:

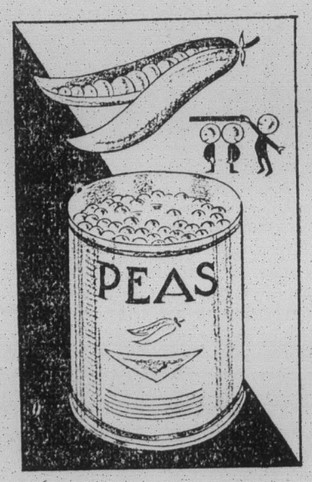
1616. All of the powers, duties, purposes, responsibilities and jurisdiction of the Director of Natural Resources, the State Park Commission, and the Board of State Harbor Commissions for the Bay of San Diego, and all other State officers or agencies with respect to the administration of the bay and harbor of Mission Bay concerning any property of the State referred to in the next preceding section are hereby transferred to and vested in the State Board of Recreational Harbor Commissioners for Mission Bay.

Sec. 7. Section 1617 is hereby added to the Political Code to read as follows:

1617. The provisions of sections 1611 to 1616, inclusive, shall not affect any easement or right of way heretofore granted or acquired upon or over any of the land or water referred to in section 1615 nor shall the provisions of said section affect in any way any lease or franchise of any such state-owned water or land. Upon the expiraton of any such lease or franchise the land or water affected shall pass into the control of the State Board of Recreational Harbor Commissioners.

Sec. 8. Section 2610 of the Political Code as added by Chapter 500, Statutes of 1933, section 3610 of the Political Code as added by Chapter 992, Statutes of 1933, and an act entitled "An act providing for a State park on Mission Bay in San Diego County and for the administration thereof," approved June 15, 1929 are hereby repealed.

The News does Job Printing



Peas In A Pod

IT'S all wrong—this propaganda about peas in a pod being alike.

It must be tiresome, if one is a twin, to hear continually, "they're alike as two peas in a pod." Actually twins are probably more alike than any two peas in the pod.

For the fact of the matter is that peas in a pod aren't alike. They differ in size and sometimes in shape. Even the taste may vary, if you are a real connoisseur of taste.

Peas As You Like Them

But in a can—that's different. It would be far more correct to say "alike as two peas in a can." For usually peas are sieved to size before canning, so that you can have tiny peas for your vegetable souffles, larger peas for your vegetable salads, and whatever kind of peas you prefer in your pea soup. And as for the taste, that too is always the same, providing you buy the same grade of peas.

Recipes for peas needn't be alike either. There are plenty of delicious ones that are different. For example:

Pea Puff with Pineapple: Drain peas from a No. 2 can and press through a sieve. Make a thick white sauce of four tablespoons butter, four tablespoons flour, one cup of milk and the pea pulp. Season to taste with salt and pepper. Add three well-beaten egg yolks and fold in the stiffly-beaten whites of the three eggs. Pour into a buttered baking dish and set in a pan of hot water. Bake in a moderate oven—350 to 375 degrees—until it is set and a delicate brown color (about twenty-five to thirty minutes). While this is baking, cook two tablespoons butter and one cup of canned crushed pineapple together until thick and rich. Spread this over the baked puff and serve at once. This serves eight persons.*

Lutheran Mission

"Hear Christ, the Prophet Sent From God" will be the theme of the next Sunday morning 10:45 o'clock sermon. Christ is more than a mere example which we, as Christians, should follow. He was not only true Man, but also true God, and He therefore also has a very definite message for each one of us. You are cordially invited to attend this service.

"Christ is Condemned to Death" is the Sunday school lesson for this Sunday in all departments. Come and bring the children closer to their Savior.

Pastor From San Diego to Speak at Lenten Service Wednesday Evening

Rev. W. A. Theiss, pastor of Trinity Lutheran church, San Diego, will deliver the sermon next Wednesday evening, April 10, at 7:30 o'clock. He will speak on "Christ Lamented", the sixth subject of the series, "Striking Passion Scenes". Come and hear this inspiring preacher. He will have a message of great comfort for you.

You are cordially invited to attend all these services, which are held in the Woman's clubhouse, Newport and Abbott streets.

CHURCHES OF CHRIST, SCIENTIST

"Judge not according to the appearance, but judge righteous judgment." These words of Christ Jesus, from John, are the Golden Text in the Lesson-Sermon on "Unreality" on Sunday in all Christian Science churches, branches of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

One of the Bible selections includes the verses from John: "In the beginning was the Word, and the Word was with God, and the Word was God. The same was in the beginning with God. All things were made by him; and without him was not any thing made that was made."

The Lesson-Sermon presents also this correlative passage from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "In the Gospel of John, it is declared that all things were made through the Word of God, and without Him [the *logos*, or *word*] was not anything made that was made.' Everything good or worthy, God made. Whatever is valueless or baneful, He did not make,—hence its unreality."

THE THEOSOPHICAL SOCIETY: POINT LOMA

"Custodians of the Ancient Wisdom" will be the topic of the public forum-lecture at Theosophical headquarters, Point Loma, next Sunday afternoon at 3 o'clock. The speaker will be Florence Collisson, instructor of history in Lomaland school and resident teacher in charge of the girls' department.

Before coming to Point Loma in 1923 Miss Collisson was principal of a school in London, England, and was for many years actively engaged in educational work at the headquarters of the English section of the Theosophical society.

She will be assisted in answering questions by Prof. Charles M. Savage, director of Lomaland Conservatory of Music.

"All who sincerely devote their highest energies to the preservation of knowledge are guardians of wisdom and truth," says Miss Collisson. "Theosophy teaches that such guardians are of ever-increasing greatness leading to those of human evolution, the Buddhas and the Christs, who through ages of effort and experience have become indeed the Masters and Custodians of the Ancient Wisdom."

SILVER ARROW TROOP
(Girl Scouts of America)

Iris and Silver Arrow troops of Point Loma high school held a successful silver tea at Wallace hall, Thursday, April 4th. A Girl Scout fashion show under the auspices of the Lion Clothing Co. was conducted by Florence Medlar.

Solos were rendered by Roberta Parker, Grace Oliver and Phyllis Cook.

A country dance was given by Julia Kelly and Addie Fish.

Loma Portal Girl Scouts were guests.

The troop extends its thanks to the troop committee, Mesdames Naomi Dick, James Oliver, Horace Boone and Roger Mackey for the success of the tea.

National Cherry Week

FEBRUARY is famous for many things. Among them — National Cherry Week. Cheer for cherries then, and serve these good dishes which an expert dietitian has devised for the nation's happiness:

Two Cherry Puddings

Clear Cherry Tapioca: Combine one cup of syrup from canned pitted red cherries with one cup water; bring to boiling and add three tablespoons quick-cooking tapioca. Cook in a double boiler for fifteen minutes, or until transparent, stirring often. Add one-fourth cup sugar, a few grains of salt, and stir until dissolved. Pour over one cup of pitted red cherries which have been drained. Turn out into glass dessert dishes and chill. Serve with plain or whipped cream. This serves four or five persons.

Baked Cherry Pudding: Sift together two cups flour, four teaspoons baking powder, one teaspoon salt and two tablespoons sugar. Cut or rub in four tablespoons shortening. Add three-fourths cup milk and when mixed, spread out thin in a deep buttered baking dish. Drain the cherries from a No. 2 can of pitted red cherries, spread over the top and sprinkle over one-half cup sugar. Dot with two tablespoons butter. Bake in a moderate oven—375 degrees—for thirty to thirty-five minutes. This serves eight persons. Serve with the following sauce.

Sauce: Mix together two tablespoons sugar and two teaspoons cornstarch. Add the syrup from the No. 2 can of pitted red cherries, and cook gently until clear and creamy, stirring constantly. Serve over the pudding. Serve cream in addition, if desired. This serves eight persons.*

Go To Church Sunday

SIXTH CHURCH OF CHRIST, SCIENTIST
1929 Cable street, San Diego, Calif.

Services are held as follows:
Sunday morning at 11 o'clock.
Sunday school 9:30 a. m.
Wednesday evening at 8 o'clock.
Reading room is open Mondays, Thursdays and Saturdays from 2:30 to 4:30 p. m., except holidays.

OCEAN BEACH LUTHERAN MISSION

Geo. M. Jacobsen, vicar in charge.
Services held at the Woman's club. Newport and Abbott, as follows:
Divine services at 10:45.
Sunday School at 9:30.
Lenten Services, Wednesday at 7:30 p. m.
A hearty welcome awaits you.

TRINITY EPISCOPAL CHURCH

Church Services at Trinity Mission Episcopal church, corner of Brighton and Sunset Cliffs Blvd.
Rev. J. B. Osborn vicar in charge
Holy Communion at 11 o'clock first Sunday in the month.
Early Celebration 8 a. m.
Church School 9:30
Morning Prayer 11 a. m.

CATHOLIC

Sacred Heart Church—Ocean Beach, at Sunset Cliffs Blvd. and Saratoga.
Sunday Masses 8 and 10.
Evening devotions 7:30
Week day Mass at 7:30
P. A. Connolly

POINT LOMA M. E. CHURCH
Cor. Sunset Cliffs Blvd. and Saratoga
Rev. James Hughes, Minister.

Church school, 9:45 a. m.
Morning worship, 11 a. m.
Young People's meeting, 7 p. m.
Wednesday Fellowship Hour 7:30 p. m.
Thurs., 7:30 p. m., choir rehearsal.
Girl Scouts, Thursday at 4 p. m.
Boy Scouts, Tuesday at 7:30 p.m.
Music by the Choir.
Brownies, Wednesday at 3:10 p.m

FIRST BAPTIST CHURCH OF OCEAN BEACH
Santa Monica-Sunset Cliffs Blvd.
Rev. W. S. Dunn, Pastor

Bible school, 9:45 a. m.
Morning hour of worship, 11 a. m.
Music by the choir.
Tuesday, 10 a. m., Sewing Circle.
Wed., 7:15 p.m, Business Girls club
Wed., 7:30 p. m. Prayer meeting.
Thurs., 7 p. m. Choir Rehearsal.
Fri., 7:15 p. m. Boy Scouts.
You are cordially invited to the services of this church.

Elim Pentecostal Tabernacle
Corner Cape May and Ebers
Mary B. Lynas, Evangelist

Sunday school, 9:45 a. m.
Morning worship, 11 a. m.
Evening worship, 7:30 p. m.
Thurs., Students' Night, 7:30 p. m.
Friday 7:30 p.m. Evangelistic ser.
A hearty welcome awaits you.

Our Weekly Bible Lesson.

(From The Sermon on the Mount—The Book of Matthew.)

BANKS OF HEAVEN NEVER CLOSE
Matthew 6—19.23

Lay not up for yourselves treasures upon earth, where moth and rust doth corrupt, and where thieves break through and steal: 20. But lay up for yourselves treasures in heaven, where neither moth nor rust doth corrupt, and where thieves do not break through nor steal: 21: For where your treasure is, there will your heart be also. 22. The light of the body is the eye: if therefore thine eye be single, thy whole body shall be full of light. 23. But if thine eye be evil, thy whole body shall be full of darkness. If therefore the light that is in thee be darkness, how great is that darkness!

SINCE Thomas A. Edison opened the first commercial electric light and power plant in New York City in 1882 the electrical industry has moved forward with enormous strides. Yet the industry is still in its infancy and the limits of its progress are not likely to be reached during the lifetime of anyone living today.

With work being pushed on huge power projects that dwarf their predecessors, and with others equally huge being planned, one of the most promising fields for the young man eager to carve out a career lies in the transmission of electric power from its source to where it is to be used. Many of the great projects, planned or under construction, are in sparsely settled areas. Their maximum usefulness depends on the continued development of methods of transmitting their power to cities and towns perhaps hundreds of miles away.

The half-mile transmission lines of the 1880's have grown to a length of 250 to 300 miles. Can they be increased to still greater lengths? Can the load they carry be increased? Can they carry their load more economically and with less loss on the way? These are some of the questions the transmission engineer must answer, and those who prove able to answer them are certain of outstanding success in their careers.

To qualify as a transmission engineer requires technical training. Many men have obtained their training at a university, but others have proved that what can be learned in laboratory and classroom can also be learned by combining practical experience with spare time study. Any number of successful transmission engineers can look back to a beginner's job in a power plant supplemented by solitary study when the day's work was done.

G. de PURUCKER LODGE APR. 12

The G. de Purucker lodge of Ocean Beach cordially invites you to attend a Theosophical lecture at the lodge rooms, 1940 Abbott street, on Friday, April 12, at 7:30 p. m. Speaker Mrs. Ethel Lambert of the headquarters staff, Point Loma. Subject, the message of Easter.

POINT LOMA EASTERN STARS

Point Loma chapter O.E.S. met in regular form Monday evening, April 1st, with Edythe F. Kenline worthy matron and Harry P. Sweet worthy patron presiding.

Following the meeting the March, April and May birthdays were celebrated, the honored guests being Mabel Bettinson, past matron of La Mesa chapter and sponsor of the 1935 matrons of San Diego county, Mary Lee, Arlie Hastings, Gladys Nelson, Ella Cole, Grace Kraft and Harry Sweet. The Easter motif was carried out in the banquet room, lovely refreshments were served by Ida T. White, assisted by Mary Johnston, Carrie Mason, Jean Zuern, and Vida Hewitt.

Harry P. Sweet gave a very impressive talk on the Star in the East. Edgar F. Hastings spoke on "Education Week".

BAPTIST CHURCH SERVICES

"In Memory of Christ Jesus" will be the sermon subject of the pastor in the Sunday morning hour of worship at 11 o'clock. The Lord's Supper will be observed at the close of the sermon.

Frank W. Wiberal will be the leader in the Young People's meeting at 6:45 p. m. The topic for discussion is "Ways of Solving Conflicting Standards".

The song service will be at 7:30 p. m. and the pastor will speak on the question "Is there an Alternative to Jesus Christ?".

You are cordially invited to the services of this church.

Outstanding Chic in "Party" Frock

PATTERN 9236

Exciting affairs—matinees, parties and the like—call for an exciting frock, a frock such as this, for instance! From the slimly modeled bodice with its rows of soft gathers at the neck, to the hem of its slenderly paneled skirt, it spells chic with a capital C! And if you think that all the smartness of the design is concentrated at the front look again! For important back interest there's that deep, buttoned yoke, cut in one with the sleeves The graceful sleeves, by the way, may end in unusual, gathered "bracelet" cuffs or be left open in elbow-length flares. The pattern indicates how to make them both ways. Lovely in flat or canton crepe!

Pattern 9236 may be ordered only in sizes 12, 14, 16, 18, 20, 30, 32, 34, 36, 38, 40 and 42. Size 16 requires 3½ yards 39-inch fabric.

Send FIFTEEN CENTS in coins or stamps (coins preferred) for each pattern. Be sure to write plainly your NAME, ADDRESS, the STYLE NUMBER and SIZE of each pattern.

Send your order to Sewing Circle Pattern department, 232 West Eighteenth street, New York.

Smiles

PLEASANT TRIP

"Did you have a nice trip?"

"Very good. My wife did all the driving."

"How lovely. So you could enjoy the scenery?"

"Yes, all I had to do was to hold the wheel."

In Doubt

"What has become of the man who used to say, 'Every day, in every way, we're getting better and better'?"

"I don't know," answered Miss Cayenne, "whether he went to heaven or whether he has joined old friends at headquarters of the Ananias club."

U Rascal U

Betty was learning her A B C's. "Now, Betty," her mother asked, "what comes after G?"

Betty didn't hesitate. "Whiz," she said.

The Man From Yonder

CHAPTER VII—Continued

—11—

Elliott had her wide open now, and the loads, on that grade, ran easily despite the binding cold in their journals. The rock and pitch of the engine were beyond belief. It seemed as though its weight must carry the light steel from its spikes as the careening threw tons of strain first one way and then the other.

The curve at the trestle's approach rushed up the valley toward him and through Elliott's mind swam all manner of misgivings. It seemed at the moment that if by any freak chance the wheels should stay on the rails, then those rails must surely give before the strain that the train's flight would exert as it took that curve. He threw one quick glance backward to see Tim Jeffers crouched on his high perch as a circus rider might stand on his boldly galloping steed. The old man chewed briskly and, as he caught a flash of Ben's face, spat and made one impressive gesture with a mittened hand, bidding the younger man get outside.

Ben had done all that he could do in the cab. Nothing within his power would be of avail if they left the track and, inside, he would have no chance at all should the wild run come to its end in the smoking waters of the river.

And so he backed into the gangway between tank and engine and slid down to the step, clinging to the hand rails, staring ahead, ready to let go if the worst, and the highly probable, happened.

The curve was there, a train's length beyond.

It was there, the length of their locomotive ahead. . . . The trucks took it with a screech and a bounce and a grind. She turned sharply and Ben thought he felt her tipping, tilting, the step beneath his feet rising as the force that strove them off at a tangent asserted itself. . . . He swung far out, to give her that much more balance, and they were straightening out with the loads thundering and clanking and leaping behind and he breathed deeply, realizing that for the interval his lungs had not functioned.

Elliott looked back again. Tim's knees were bent still lower. He was leaning far to the right and he nodded sharply as if in triumph.

And now they charged at the bridge, at that rough, new crossing of Hoot Owl. The engine bounced and quivered and seemed to stumble as she took the newly laid track. But she slammed back to balance and her tires chewed the frost, and they were over and charging the rise beyond!

Ben clambered back into the cab and tugged at the throttle, cursing because it would not open wider. He strained as though by his very posture to help the machinery meet that demand upon it. Nobly, the little locomotive breasted the rise; bravely she lunged into that hill with the exhaust roaring fit to beat the rusted, burned stack from her. She spat cinders and smoke high into the air and the steam clouds from leaking gaskets enveloped Elliott, curling about him, shutting off his view. They were slowing, now. The roaring drum of the exhaust had dropped now to a sharp panting.

They were half-way up before he touched the reverse lever. He let it down slowly a notch at a time, using every last inch of the momentum he had gained. Up, now three-quarters of the way. Ben could see the rails on the bit of level going at the top. Up another train's length, slowing with each foot gained. Afar off, across the snow-blanketed country, a plume of white vapor trailed a break in the forests. That was the local, crossing the river, swinging in toward his siding.

"Go it, girl! Go it, girl!" he yelled at the engine, swinging one fist.

She shoved her nose over the crest, seeming to weave it from side as in distress. Her drivers slipped and spun a half turn; caught on sand, held. She began a stuttering, dying puff. The sound wavered. She seemed to stop, and cleared her cylinders with a short belch. . . .

She was on top. Her last breath had turned the trick.

"Hold to it, old timer! Hold to it!" Ben croaked.

The first car gained the crest. The locomotive was on the down grade, now, the second car coming across the creek. The third car rumbled over the top and Tim Jeffers, dropping his peavey, wormed along the logs and turned down to the brake wheel as Ben shut her off, set the brakes and with a boyish swing of one arm yanked on the whistle cord to set her voice screaming.

Back on the last car Tim clubbed brake wheels. Out on the first, Ben Elliott drove the shoe home. The ancient locomotive dug her heels in and settled back. Down and down they went on the frost slick steel, gathering speed that was as alarming as the slowing of their pace had been a moment before. But with every train length traveled Tim Jeffers was setting more brakes against the humming wheels.

She slid, she slipped, she squealed and complained and clattered her way over that final mile. They had her under control at last and slowly they edged around the curve at the millpond, out onto the siding and to a full stop.

Ben, dropping down, ran across to the main line and held up his hand. Half a mile down the track the local puffed in toward him. The whistle sent up its cloud of steam at his signal, he heard the engineer shutting off and in minutes the train slid in, brakes grinding.

"That stuff go?" the conductor called, swinging down from the way car.

"That stuff goes!" Ben said almost reverently and turned to face Tim who was filling his pipe with unsteady hands.

It was a moment for the right word. But Tim Jeffers was not a man of words; not of many words.

"Well, you done it," he said simply.

"Yeah. With your help."

"Still needin' a camp boss?"

"Badly."

"Spose I'd do?"

"Do! Lord, Tim, if—"

"All right. I'm hired to get out logs again. Guess I'll hit Mr. Butler for a cuppa car ee. I've rode trains now 'nd again, Ben, but of all the rides I've ever took that was what you might call th' dangdest!"

* * * * * * * *

In a Minnesota lumber town a bearded man sat near the stove in a small hotel and heard the story of what was happening in distant Tincup.

"Know him?" another listener asked the narrator.

"Not the kid. I know Brandon, 'nd I know Tim Jeffers. Top loaded for him three winters. If Tim's back there's a hot scrap on and . . . gosh! but I like scraps."

"Mean you're pulling for Tincup?"

"I'll say I am!"

The bearded man cleared his throat. "You think, then, that the lad's got a chance of making it against Brandon?" he asked.

"It sure looks as if he had a chance. With old Tincup shanty boys hitting back for their stamping grounds his chances are getting better. Ever been in Tincup, Martin?"

The other closed the blade of his pocket knife and pulled at the lobe of his left ear with his right hand.

"I've heard of the place," he said quietly.

"Better hoist your turkey and come along with me. Likely he could find a place for a good bookkeeper."

Martin smiled oddly but made no other response.

In far flung camps and mill towns the story was being repeated, just such men were leaving jobs and turning their faces toward Tincup, known through the Lake states for the tyranny that Nicholas Brandon had exercised there so many years.

Ben, sitting with his feet on Able's desk in the justice's office, grinned broadly as he told of the latest developments on the job.

"Sixty-four men in camp this morning," he said. "Over thirty of 'em new and the best looking bunch of loggers I've seen since I was a kid."

Able glanced at a letter he had been holding.

"And with the Milwaukee people standing ready to finance us it looks as if you might, maybe, perhaps be getting ready to find it all down hill and shady, Ben. I think that interesting this particular bank is the best piece of work you've done yet."

"Nothing, Able. All I had to show was what we were doing. They can't lose with the lumber behind their notes."

"Unless Brandon finds a way."

"You've got to watch every loophole, Benny. And you've got too much for one man to do."

"Oh, it's not that bad. Things are straightening out. Tim's a wonder; Butler isn't missing a bet. We ought to keep right on stepping."

Ben rose to go and, as he did so, the door opened and Dawn McManus stepped in out of the lightly falling snow.

"Oh!" she cried in surprise. It was the first time she had seen Ben since that morning a month ago when he took the veneer logs on their mad ride to save the Hoot Owl operation from immediate insolvency. "Am I interrupting?"

"Come in, Dawn," said Able, rising.

And Elliott said: "If you are, it's nice to be interrupted."

She looked at him and, at first, her eyes held that coolness which was almost hostility but this melted and she smiled.

"You say nice things, Ben Elliott!"

"How can anyone help saying nice things to nice people?"

She made a playful mouth at him and Ben, watching her as she advanced to Able's desk, thought again that he never had supposed women grew to such loveliness.

Her errand with the old justice was brief. She and Ben went out together, Dawn on her way home, Ben to finish his errands in town.

At the corner where their ways parted they stopped and Dawn hesitated in what she had been saying. Then, looking into his face, she asked.

"Does Mr. Ben Elliott ever take tea with a young woman? You know, I am beginning to think that I like to talk to you!"

"Then the risk of having it reported that I'm a lounge lizard is as nothing."

The house where Dawn lived was the house in which she had been born, a sprawling white frame structure beneath whispering hemlocks. She led Ben into a long, low room, with wide, low windows, where a fire burned on an open hearth.

The fine odor of baking bread permeated the place and as they entered Dawn lifted her voice in a light hail:

"Oh-ho, Aunt Em!"

Sounds came from the rear; a door opened and closed, and then another door opened which gave into the room where they stood, and an ample woman in a checked apron, her face flushed as by stove heat, entered hastily.

"Yes, dearie— Well!"—stopping in surprise

"Aunt Em, this is Mr. Elliott."

"How d'y do!" Her voice was full and deep, like a man's. "I've seen you, young man, and if I was a hand to say what most folks say I'd tell you that I feel like we're old friends." She shook hands vigorously. "You're a big young feller, Ben Elliott!"—eyeing him up and down.

Dawn laughed again as she drew off her coat.

"Don't you tell a soul, Aunt Em, but we are going to have tea! If his shanty boys ever heard about it they might think he was too much civilized for them."

"Pshaw! As if what other folks think counts!" She looked narrowly at Dawn and Ben saw the girl's face change. "It's what I've told Dawn ever since she was little, Ben, that it's what you think about your own self that matters; not what anybody else thinks. Well! You two set and I'll get tea."

She hurried out and Ben drew up a comfortable chair before the fire.

In the half hour that elapsed before the older woman returned Ben learned much about Dawn McManus. This was her house, her home. Aunt Em, then a young woman, had been housekeeper there after Dawn's mother died. She had stayed on, keeping the place up through the years that Dawn was away at school, making a living for herself by baking, and now that Dawn was home again she was the girl's closest friend and only confidant.

"There are so many people here now who are not . . . No, I'll put it the other way: I'm not congenial company for many people in this country. It isn't their fault. It's wholly mine." Her manner, which had been easy, began to stiffen a bit. Ben thought as though she steeled herself for an ordeal.

"People have a right to their opinions, of course. Evidence was strong against my father. But he was no killer. He never harmed anyone. I'm sure of that. When people think of him as alive and a fugitive or dead and disgraced it stirs my temper! You've heard about my father."

"Of course."

"Naturally, you would."

They talked, after that, of personal tastes, of the glories of big country, of the limited recreations offered by little towns.

"Just the movie! Now and then there's a dance," the girl said, "but none of the boys seem to want to take me. . . . It is my fault, likely." She was staring moodily into the fire. "I frighten them away. Mr. Brandon asks me to go to the movie now and then but . . . I don't know . . ."

"So Brandon wants to amuse you, does he?"

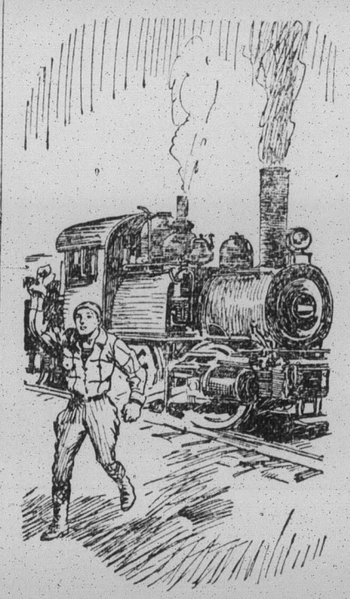
"Yes. He's been awfully kind to me, always. Of course, I know that Able and a lot of people think he's after the Hoot Owl and is quite ruthless about it but they can prove nothing. He was so good to me when I was little and talks so reasonably to me now that I can't believe their suspicions are well founded. Still . . . Things do seem to happen at Hoot Owl. Mr. Brandon's explanation of the fire and dynamiting is that you made an enemy of Bull Duval and his friends and that they are striking back for spite. That sounds reasonable, doesn't it?"

"Yes," said Ben, unwilling to argue any such point with her.

At this juncture Aunt Em came in with food that was surpassingly fine and for an hour they sat and talked while darkness fell.

Ben was rising to go when the doorbell rang. Aunt Em went to answer the summons and as a man's voice sounded in the hallway Dawn broke short what she had started to say. A moment later Nicholas Brandon entered the room.

The man's face, as he crossed the threshold and saw Ben, was a study. Lights flickered in his black eyes, a faint flush whipped up over his dead white cheeks and he opened his lips as in a light gasp of surprise or else preparatory to sharp speech.



Half a Mile Down the Track the Local Puffed in Toward Him.

But he gathered himself on the instant, moved directly to Dawn and with an even, kindly tone greeted her.

The girl turned as Brandon still held her hand and Ben thought she was moving it gently for release.

"Mr. Elliott, I think you must know Mr. Brandon." Ben bowed, a bit stiffly.

"Yes," he said. "Yes. I met him once."

Then Nicholas Brandon did an amazing thing, which went far in explaining Dawn's skepticism of the town's attitude toward him to Elliott. He laughed. He laughed easily, naturally, and in the laughter was an admission of embarrassment which rang true.

"Indeed we have! Under different circumstances! How are you today, Elliott?" He advanced and extended his hand still smiling and Ben was so amazed that mechanically he accepted it. "Yes, we've met before,"—turning to Dawn and Aunt Em—"under quite distressing circumstances. We met on unfriendly ground and both lost our heads a little. I hope Mr. Elliott doesn't harbor any resentment. As far as I'm concerned I've only regret for the affair!"

TO BE CONTINUED.

SYNOPSIS

Ben Elliott—from "Yonder"—arrives at the lumbering town of Tincup, with Don Stuart, old, very sick man, whom he has befriended. He defeats Bull Duval, "king of the river," and town bully, in a log-birling contest. Nicholas Brandon, the town's leading citizen, resents Stuart's presence, trying to force him to leave town and Elliott, resenting the act, knocks him down. Elliott is arrested and finds a friend in Judge Able Armitage. The judge hires him to run the one lumber camp, the Hoot Owl, that Brandon has not been able to grab. This belongs to Dawn McManus, whose father has disappeared with a murder charge hanging over his head. Brandon sends Duval to beat up Ben, and Ben worsts him in a fist fight and throws him out of camp. Don Stuart dies, leaving a letter for Elliott "to be used when the going becomes too tough." Ben refuses to open the letter believing he can win the fight by his own efforts. Fire breaks out in the mill. Ben, leading the victorious fight against the flames, discovers the fire was started with gasoline. Elliott gets an offer of spot cash for logs, that will provide money to tide him over. But a definite time limit is set. Ben meets Dawn McManus and discovers she is not a child, as he had supposed, but a beautiful young woman. The railroad bridge over which the Hoot Owl lumber must pass, and at once, to meet the time limit imposed in the contract, is blown up. By superhuman efforts Ben builds a new bridge overnight.

Friendly Potato Is Not Appreciated, Expert Says

One of the very best foods, the potato, is not fully appreciated asserts an agricultural expert. For the human body to function properly, starches and sugars are required to produce energy or fuel; proteins to develop tissue; minerals and other dietary essentials such as vitamins. Potatoes meet the ideal requirements for the body by producing a large amount of energy, some protein, a fair amount of minerals and an adequate assortment of essential vitamins, as well as supplying bulk. The potato is probably our best staple food and one which should fill a much larger place in our diet.

Many persons avoid potatoes because of their supposed fattening properties. This popular prejudice has little foundation in scientific fact. The potato, like any other food stuff is fattening only when eaten in a quantity more than sufficient to meet the body needs. The potato is no more fattening than the same amount of bread or any other cereal. History as well as geography shows that those people whose diet contains a large proportion of potatoes enjoy good health. In Ireland and Germany, where potatoes are widely and largely used, the health and stamina of the people is good and the death rate low.

The Panther

The term panther is used to refer either to the spotted leopard of the Old world or to the mountain lion or puma of the New world. These cats are about the same size and adult specimens weigh between 200 and 300 pounds.

NONCHALANT

Philosopher—I take things as they come.

Shoplifter—And I take things as I go.

WHEN YOU TAKE A LAXATIVE

... use a spoon

It isn't what brand of laxative you take that's so important—it's the *form*. A liquid laxative can be taken in any required amount. If only a little is needed, you need never take a bit too much.

Doctors favor the easily measured *liquid* laxatives. Instead of any form that does not encourage variation from the fixed dose. A fixed dose may be an overdose for you—or your child.

Always remember this one thing about constipation: *the secret of any real relief is reduced dosage.*

Give the bowels only as much help as may be needed, and less help as the need grows less. You will find Dr. Caldwell's Syrup Pepsin an excellent aid in regulating the bowels. It contains senna and cascara (natural laxatives) and it will clear-up any bilious, sluggish condition without upset. Delightful taste, and pleasant action. Your druggist has it.

Dr. Caldwell's SYRUP PEPSIN

MILNESIA

Keeps you free from acid

TAKE Milnesia Wafers and keep your digestive system clear of the over acidity that slows you up mentally and physically. Each Milnesia you chew gives you equal teaspoons of milk of magnesia, *the best known anti-acid, in palatable form.*

CHILDREN take these tasty wafers readily, no matter how much they dislike liquid milk of magnesia.

GIVE MILNESIA A TRIAL

20c tins or 35c and 60c bottle

WATCH YOUR KIDNEYS!

Be Sure They Properly Cleanse the Blood

YOUR kidneys are constantly filtering impurities from the blood stream. But kidneys get functionally disturbed—lag in their work—fail to remove the poisonous body wastes.

Then you may suffer nagging backache, attacks of dizziness, burning, scanty or too frequent urination, getting up at night, swollen feet and ankles, rheumatic pains; feel "all worn out."

Don't delay! For the quicker you get rid of these poisons, the better your chances of good health.

Use *Doan's Pills*. *Doan's* are for the kidneys only. They tend to promote normal functioning of the kidneys; should help them pass off the irritating poisons. *Doan's* are recommended by users the country over. Get them from any druggist.

Lead Indispensable in All Forms of Painting

Although used extensively in printing and plumbing, in refining petroleum, and in manufacturing insecticides and certain colors, lead's most important use is in paint. Because of its strong adhesion to metal, red lead (red oxide of lead) is the standard protective paint for iron and steel. Where a lighter and more decorative paint is needed, white lead is admirable, since exposed to weather, it lasts longer than any other pigment, with the possible exception of lampblack.

The United States produces and consumes more lead than any other country in the world. After the metal has been located in beds of shale, chiefly in Missouri, and smelted, it is manufactured into commodities by one of three processes. Slabs of lead, rolled between heavy rollers to sheets of desired thinness, are wrapped like rugs around a pole and shipped for use as linings for tanks holding corrosive acids, as coverings for roofs, as plates interposed for protection between the radium worker and his dangerous mineral, and as linings for X-ray laboratories.—Bulletin, National Geographic Society.

Hotel in the Air

The new Zeppelin, which is under construction in Friedrichshafen, Germany, will carry the equivalent of a two-story building, with 25 bedrooms, a dining room, 45 feet long and baggage room large enough to hold automobiles. The craft will be 600 feet long and more than 120 feet wide at the center.

Two Discarded Pens

give you one good pen free. Mail two wornout fountain pens. You will receive one good fountain pen, guaranteed one year, without cost. 5,000 schools use my plan. Pens are rebuilt, with new points, etc. State color. BROE PEN EXCH., 3922 Southeast 48th Ave., Portland, Ore.—Adv.

Dr. Pierce's Pellets are best for liver, bowels and stomach. One little Pellet for a laxative—three for a cathartic.—Adv.

Mystery Cleared Up

Friend—I bought your book in Hamburg.

Author—Oh, so it was you.

Lowly Snail Factor in Return to "Normalcy"

The lowly snail, famous for his lack of speed, is hurrying the return of better times in the Herxheim, the Pfalz (Germany) district.

The first Weinberg snail farm in Germany was opened there last year when a wine grower hit on the idea of putting the snails under his grapevines to work.

He found that if they were picked up early in the morning or after a rain and segregated to a special "farm," they could be bred and grown systematically.

The first frost last fall found each snail sporting a new jacket, tough enough to stand the knocking around he got when he was shipped to French markets.

Connoisseurs in France report that the German variety is equally tasty when compared with the best French Weinberg snails, and the result is that other wine growers in the Rhine Palatinate are running successful farms of their own.

Scientists Find Fast Way to Relieve a Cold

Ache and Discomfort Eased Almost Instantly Now

1. Take 2 BAYER Aspirin Tablets. Make sure you get the BAYER Tablets you ask for.

2. Drink a full glass of water. Repeat treatment in 2 hours.

3. If throat is sore, crush and stir 3 BAYER Aspirin Tablets in a third of a glass of water. Gargle twice. This eases throat soreness almost instantly.

NOTE
"DIRECTIONS PICTURES"

The simple method pictured here is the way many doctors now treat colds and the aches and pains colds bring with them!

It is recognized as a safe, sure, QUICK way. For it will relieve an ordinary cold almost as fast as you caught it.

Ask your doctor about this. And when you buy, be sure that you get the real BAYER Aspirin Tablets. They dissolve (disintegrate) almost instantly. And thus work almost instantly when you take them. And for a gargle, Genuine Bayer Aspirin Tablets disintegrate with speed and completeness, leaving no irritating particles or grittiness.

BAYER Aspirin prices have been decisively reduced on all sizes, so there's no point now in accepting other than the real Bayer article you want.

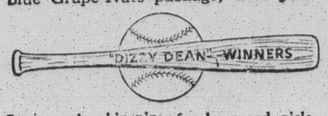
NOW 15¢

PRICES on Genuine Bayer Aspirin Radically Reduced on All Sizes

DIZZY DEAN plows one over

Boys! Girls! . . . Join the Dizzy Dean Winners

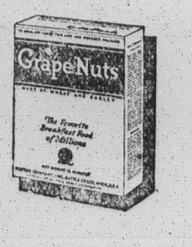
Just send the top from one yellow-and-blue Grape-Nuts package, with your name and address, to Grape-Nuts, Battle Creek, Mich., for your membership insignia and free copy of the club manual—"Win with Dizzy Dean"—and list of other valuable free prizes.



Free membership pin—for boys and girls. Solid bronze with red enameled lettering. A pin you'll be proud to wear.

This offer expires July 1, 1933

And start building up your energy by eating Grape-Nuts. It has a winning flavor all its own—crisp, nutlike, delicious. It's economical, too. Two tablespoonfuls, with whole milk or cream, provide more varied nourishment than many a hearty meal. A product of General Foods.



LOCAL AND PERSONAL EVENTS

A son was born to Mr. and Mrs. Charles H. Propster, 5111 Voltaire street, March 29, at Mercy hospital.

—‡-‡—

The United Commercial Travelers will hold a memorial service Sunday at 11 a. m. at Wallace hall, Ocean Beach. Rev. John Osborn will conduct the service.

—‡-‡—

Mr. and Mrs. R. E. Hughes and son of Berkeley arrived Sunday evening to spend a week visiting with J. P. Froide and family. Mrs. Hughes is Mrs. Froide's sister.

—‡-‡—

Kraft's Drug store this week had a number of Neon window signs added to brighten up their attractive place of business, keeping it truly up-to-date in every particular.

—‡-‡—

Miss Lucille Cadman of Wenatchee, Wash., is now visiting her aunt, Mrs. P. J. Grandmaitre in Ocean Beach. She expects to spend about two weeks looking over southern California. Mr. and Mrs. Grandmaitre took their visitor for a tour of the Exposition grounds in Balboa park Wednesday and later in the week to visit friends in Long Beach.

—‡-‡—

Local police officers during the past week have cleared up a number of household burglaries where furniture and cooking utensils have been taken from houses at Mission Beach, with the arrest of Jeanne and Bill Brandt at 1935 Diamond street, Pacific Beach, where this couple had furnished a house with stolen goods, painting most of it over in an effort to escape detection.

—‡-‡—

R. H. Babbitt, 4834 Santa Monica avenue, Tuesday reported to Ocean Beach police, that while away from home for a week, March 25 to April 1st, someone had entered his home and stolen groceries, clothing and household equipment to the value of about $90.00 The rear doors and windows of the house were securely fastened, some nails being used, and it is presumed the thieves gained entrance with a pass key to the front door.

DINNER FOR PRINCIPALS MOORE-HANNAY WEDDING

Miss Kathryn Rannells entertained Miss Marie Moore and her fiance, Patrick MacDowall Hannay, with a dinner Friday night at her home in La Jolla. After dinner the party proceeded to the home of Mr. and Mrs. P. M. Hannay, parents of the groom-to-be, where the Rev. Francis Eric Bloy conducted a rehearsal of the wedding.

Bridal attendants of the couple will be Miss Winifred Kenline as maid of honor and Lt. (jg) Ralph W. Elden best man. Owen Fuller will sing the wedding songs.

Guests at the dinner Friday night included Miss Moore, Miss Kenline, Mr. Hannay, Lt. Elden and Mr. Fuller.

The News does Job Printing

LOTUS CIRCLE FOR CHILDREN

A Lotus Circle for children meets every Sunday morning at 10:30 at 1930 Abbott street. The lesson for April 7th will be "The Gold, Silver, Bronze and Iron Ages" and "A Review of the Life of the Hero Hercules." A cordial welcome is extended to all children and parents who are interested in the ancient wisdom religion.

—‡-‡—

Bob Adams, barber, this week opened his shop in the new location at 5063 Newport avenue, and will be glad to have old and new friends call for first class tonsorial service.

—‡-‡—

Mrs. J. E. Dunbar of Long Beach was a business visitor in Ocean Beach Tuesday. Mrs. Dunbar, a former resident and still a property owner here, reports their skating rink business at Long Beach, good.

—‡-‡—

Mrs. Eugenie Sterne entertained in her home on W. Pt. Loma Blvd, Sunday evening. The birthday of her husband, Dr. Sterne, was combined with a cleverly arranged April Fool's party. From the sign on the front door "Not At Home" to games, camouflage refreshments and colapsible forks the evening was certainly a jolly affair. Ending with dainty refreshments and a lovely birthday cake.

—‡-‡—

Mrs. Mary A. Johnston, 5076 Muir avenue, has word from Jackson, Michigan, to the effect that her son-in-law, John Housen, is critically ill and not expected to live. Mr. Housen has been in the hospital for two weeks with a complication of ailments and last reports were that he was not conscious. John was a regular attendant at Ocean Beach Kiwanis on his several winters spent here and friends sympathize with the family in their trouble.

GIRL SCOUTS' ITALIAN DINNER TROOP NO. 53

In an endeaver to add to the summer camp fund the Girls Scout troop 53 will give a spaghetti dinner at the Ocean Beach school cafeteria, Saturday, April 13th, from 6 to 7 p. m. Tickets will be sold by the scouts.

Scribe, Carolyn Hollingshead.

LA MESA WOMAN WINS RECIPE ENDORSEMENT

Mrs. E. V. LeVeque, Box 354, La Mesa, California, has just been awarded a certificate of recipe endorsement by Better Homes & Gardens for her recipe, "Tuna Loaf."

Tuna Loaf: This recipe has become a favorite with my family and it is also ideal as a luncheon special.

1 small loaf of bread
1-4 cupful of melted butter
1 cupful of evaporated milk
1 small onion, cut fine
1 small green pepper, cut fine
2 cans of choice white tuna
Salt and pepper to taste.

Cut the top from a loaf of bread, by removing in one slice. Hollow out the loaf leaving a wall of about 3-4 inch. Brush the inside of the bread with melted butter. Heat the milk to scalding, add the crumbs removed from the loaf, the chopped onion, green pepper, flaked tuna and salt and pepper to taste. Place in the bread cases and bake in a moderate oven (350 to 375 degress) for about 30 minutes. Serve on a platter with a rich cream sauce or creamed peas. Serves 6 to 8.—La Mesa Scout.

See Dumont for rentals, real estate and insurance, 2137 Sunset Cliffs Blvd., Bayview 0944-J.

TO TRADE—Permanent resident at Ocean Beach has valuable residence lot in Detroit, Mich., worth $5,000, will trade for good lot in Ocean Beach. What have you. Address THJ, News office. 16tfc.

Annual Report A.T.&T.

For every dollar the Bell Telephone System earned for its 800,000 owners last year it paid more than 70 cents in taxes. This was revealed in the Bell System's annual report recently released, which showed that telephones are now taxed on an average of $6.76 each annually. The total tax bill, according to the report, was $89,500,000. After paying interest on its bonds the company earned $5.96 per share on its American Telephone company common stock, which, in view of the money invested by the stockholders in this business, is a return of about 4½%. Financial authorities point out that while this is a common stock subject to all the risks of that type of security, the earnings last year were just about the same as on a low risk bond.

The report dealt more fully than ever before with the financial background of the company which has enabled it to protect the investors in a remarkable manner through five years of depression. The American Telephone and Telegraph company which has 675,000 stockholders, had a record at the outset of the depression of never having missed a dividend in half a century. This perhaps as much as anything else was instrumental in enabling the company to raise a tremendous amount of capital which it had to have to meet demands for service during the boom years 1920 to 1930. To date its unbroken dividend record has been continued through five years of depression, paying $9 dividend per share on its common stock each year. The company has only one class of stock, all of it of the voting share type, and contrary to many organizations which found it necessary to pay large commissions in order to market its securities, has received an actual premium over and above the $100 par value of $14.40 a share. In addition, it is explained in the report, the company did not, during the boom years, declare any extra dividends either in the form of stock or cash. It consequently had a substantial surplus at the outset of the depression and the stockholders' equity at the end of 1934 amounted to $21.50 per share. This amount, plus the paid in amount of $114.40 makes a total of $135.90 per share which is the stockholder's investment left in the business at the present time. On that basis, according to the report, the earnings of the company amounted to 4.4 per cent. The $9 dividend was paid last year by taking $3.04 per share out of the surplus accounts of the company which permitted the payment of a $9 dividend. This represents an actual return to the stockholder of 6.6 per cent on the $135.90 per share investment he has in the company.

Those who feel that it is in the interest of the country to keep business going through keeping funds in circulation during depression times point to the steady dividend policy of the telephone company. If the company had declared extravagant extra dividends or otherwise dissipated its funds during the boom years, it would doubtless long since have been forced to curtail dividends or discontinue them which would have adversely affected the buying power of 675,000 stockholders.

The annual report also pointed out that service has been maintained at a high level through the depression and that service records indicate plainly that better telephone service was provided in 1934 than at any other time in the history of the company. The report alo recalled that just after the telephone was invented, Alexander Graham Bell and his associates developed definite ideas as to the type of organization needed to provide high quality nation-wide telephone service. These 'fundamentals as outlined more than half a century ago and as put into operation by the Bell System include:

1. A central administrative coordination with decentralized and localized operations in regional organizations.

2. A nation-wide long distance service.

3. A centralized manufacturing organization to make standard apparatus.

4. A central bureau for scientific research and development.

In concluding the report, Walter S Gifford, president of the American Telephone and Telepgraph company, said: "Fifty-nine million messages a day 'got through' in 1934 and service standards were the highest on record. This achievement evidences the skill and enthusiasm of the quarter of a million men and women of the Bell System who are devoted to an essential public service in which over-all success is so dependent on the efforts of each individual."
